Product/Process Change Notification
Production Flexibility Suzhou (PRC) plant

	ID Number: PCN-20140812-SS
Affected Product	KEMET Series R41, R46, R47, R49, R71, R74, R75 having lead spacing of 27.5mm and 37.5mm
Change	<p>The affected products will be also produced in the KEMET Suzhou plant location. This will be achieved without impact to product form, fit, or function as the products are equivalent to those produced in other KEMET locations with respect to physical, mechanical, quality and reliability characteristics.</p> <p>The new qualified location will utilize equivalent manufacturing equipment and processes of existing KEMET production locations, and complies with standardized control techniques, which meets stringent qualification testing to guarantee product performance.</p>
Justification and Benefits	Such production flexibility in Suzhou plant will result in an enhanced capability to support KEMET Customers with same typology of products from an additional plant located in PRC.
Effective Date and Identification	First shipments from Suzhou shall take place on or before 31 October 2014. Without acknowledgement of this amendment notification by 15 September 2014 KEMET will proceed to implement the change as described herein. Identification of parts from Suzhou plant will be made by the lot code on the part. No other changes to appearance or label will be made.
