

Product Number: CY8CKIT-025

PSoC Precision Analog Temperature Sensor Expansion Board

Designed for use with the CY8CKIT-030 PSoC 3 Development Kit, the CY8CKIT-050 PSoC 5 Development Kit, or the CY8CKIT-001 PSoC Development Kit (all sold separately).

Cypress's PSoC programmable system-on-chip architecture gives you the freedom to not only imagine revolutionary new products, but the capability to also get those products to market faster than anyone else. This kit enables you to measure temperature accurately with a 0.1° C resolution with four different temperature sensors.

Hardware Description

The kit contains:

- Four different types of analog temperature sensors
- Includes a bonus CY8CKIT-012 PSoC Prototyping and Development Expansion Board
