Next Generation x-TTA Solution

Next generation WiMAX and Long Term Evolution (LTE) Fiber/Power/Signal To The Antenna (x-TTA) connectivity designs require rugged cable assemblies for outdoor use. For direct connection, these cable assemblies need to plug directly into the optical transceivers or other connector types though a bulkhead construction.

For this specific application, the connector design will need to accommodate for a large tolerance in Z-direction. Furthermore, the connector shell must allow for easy one handed mating. TE Connectivity’s (TE) FullAXS connector sealing systems were designed to function with a very large Z-axis tolerance, hence accommodating for the broadest range of transceivers on the market. This unique feature allows end users to pick almost any transceiver they wish.

The FullAXS connector sealing system and cable assembly includes FullAXS Mini and FullAXS connector sealing products.
Overview

Product Portfolio

CONNECTOR SEALING

FullAXS Mini Connector (29.2mm)  FullAXS Connector (36mm)

FullAXS Mini Connectors

FullAXS Mini connectors deliver the small size and scalability to design in power and signal connectivity anywhere on the box. Their easy-to-install mating features and ruggedized protection allow them to be installed in virtually any environment.

Efficiency in Design

FullAXS Mini connectors are about 20% smaller than FullAXS products and can be placed anywhere on the box thanks to their flexible sealing system. As space in the bottom of the box gets smaller and smaller, FullAXS Mini connectors make it easy to transmit power or signal using connections anywhere. Their modular design make them scalable in form, fit and function.

Mating Made Easy

FullAXS Mini connectors are one of the only products available that enable one-handed, blind installs from any angle including upside down. With 3-sense locking feedback, floating connection and a twist angle of only 30°, FullAXS Mini connectors can be installed by field engineers of all levels of experience in virtually any location.

Long Lasting in Harsh Environments

FullAXS Mini connectors deliver a water tight seal up to IP67 and IP65 levels, use UV material to meet F1 rating, UL 94-V0 and withstand lightning strike requirements per IEC 62305-1 for shielded version, up to 20kA at 10/350 micro sec.

Applications

- Wireless outdoor applications
- WiMAX and LTE base stations
- Remote Radio Heads (RRH)
- Industrial outdoor applications
- Robotics
- Aerospace and defense

Specifications

Environmental
- IP65 and IP67 (IEC 60529)
- Operating temperature range: -40°C to 85°C
- Salt spray (EIA 364-26B Condition A)
- UL F1 rated (ISO 4892-3)
- Flammability rating UL94-V0
- RoHS/Reach Product Compliance

Mechanical
- 100 mating cycles (EIA-364-9)
- 150 N side load (IEC 60512-17-1 / EIA-364-38)
- 150 N pull force (IEC 60512-17-1 / EIA-364-38)
- Vibration 10-150-10Hz sweeping (IEC 60512-6-4)

Application Spec
- 114-32138

Product Spec
- 108-19486
FullAXS Mini Connectors

Key Product Features

**Efficiency in Design**
- About 20% smaller than FullAXS connectors
- Flexible sealing system allows connectors to be placed anywhere on the box
- Modular design makes connectors scalable in form, fit and function

**Mating Made Easy**
- Twist angle to lock the robust bayonet is only 30°
- Enables one-handed, blind installs from any angle using only thumb and index finger to easily grip the tapered back end of the connector
- 3-sense locking feedback: visual, audio and tangible
- Floating connector solution secures correct mating in Z-direction

**Long Lasting in Harsh Environments**
- Ingress protection according to IP65 and IP67
- UV material meets F1 rating, UL 94-V0
- Withstand lightning strike requirements per IEC 62305-1 for shielded version, up to 20kA at 10/350 micro sec
FullAXS Mini Connectors

Products

FIBER OPTIC FLOATING CABLE ASSEMBLY

Features
• Open bulkhead for easy access to SFP
• Bulkhead cutout allows for removal of transceiver through the bulkhead (no need to open Remote Radio Head (RRH) for transceiver replacement)
• Water proof, dust proof and corrosion resistant
• Plug has tolerance free design, free floating on Z-axis
• No cable buckling during or after installation

Specifications
Mechanical/Electrical
• 100N pull force at cable (IEC 60512-17-1 / EIA-364-38)
• 50 N side load in all directions at cable (IEC 60512-17-1 / EIA-364-38)
• Controlled ferrule compression force (IEC spec 61300-3-22)
• PIM < -140dBc of 38dBm at 1800MHz

Optical Duplex LC Interconnect
• Insertion loss 0.3dB (SM) and 0.5dB (MM) (IEC 61300-3-4 method B)
• Return loss 50dB (SM) and 30dB (MM) (IEC 61300-3-6 method 1)

FIXED COPPER CABLE ASSEMBLY

Features
• Cable diameter max. 9.5mm, using the same outer shell as FO version (29.2mm)
• Fully shielded from the braid 360 degrees to the box wall for best performance
• Length to panel (w/o boot) 80mm
• Fixed versions for ET power and RJ45
• ET power connector fixed with body alignment adapters in inner body for easy, one-handed mating with blind mate feature

Specifications
Mechanical
• 50 mating cycles (EIA-364-9)

Electrical
• 20A simultaneously
• Voltage max 60V
• Protection against lightning up to 20 kA at 10/350μs (IEC 62305-1)
• EMI protected 1 GHz at -30dB (IEC 60512-23-1)
• DATA TBD
FullAXS Mini Connectors

Products

FIELD INSTALLABLE

Features
- Fiber DPX “fool proof” design protects the fiber cable during uninstallation by preventing the outer shell being turned before the nut is unscrewed (see diagrams below)
- Long version includes clamp to tube
- Plug diameter 29.2mm

“Fool Proof” Feature

Latch on bayonet shell goes into the groove in the threads

Nut locks the latch in the groove, preventing the bayonet shell from being disconnected first

Installation of FullPROOF

Uninstallation of FullPROOF

Toolless

Hand Tightened Foolproof

FullAXS Connectors

Applications
• WiMAX and LTE Base Stations
• Remote Radio Heads (RRH)
• Industrial outdoor applications
• Robotics
• Aerospace & Defense

Key Features
• Open bulkhead for easy access to SFP
• Positive mechanical feedback to operator when fully mated
• One-hand mating
• Duplex LC interface
• Bulkhead cutout allows for removal of transceiver through the bulkhead (no need to open RRH for transceiver replacement)
• Robust bayonet locking for easy, fast, and secure mating
• Multimode and single mode
• Water proof, dust proof and corrosion resistant.
• Expansion to RJ45 and Power possible
• Plug has tolerance free design, fully free floating on Z-axis
• No cable buckling during or after installation.
• Cost effective metal die cast bulkhead
• Field installable version available

Mechanical
• Designed to meet 150 N cable retention
• Designed to meet IP67
• LC interface
• Single- and Multimode
• Adapter footprint : 36mm x 36mm
• Bayonet style locking
• Duplex LC interconnect MM or SM
• No tools required
• Operating temperature : -40°C to +70°C
• Mating durability min : 100 cycles.

Specifications
• Temperature : -40°C to +70°C
• 150 N Pull Force : per IEC61300-2-4
• Protection Class : IP 65 (IP 67 on request)
• 100 Mating Cycles
• Vibration : per IEC 61300-2-1
• Salt mist : per IEC 61300-2-26
• Impact : per IEC 61300-2-12
• Temperature/Humidity : per IEC 61300-2-22
