

ACL Flux Remover Heavy Duty

MPN: 8620

For removing encrusted no-clean & rosin flux

Flux Remover Heavy Duty is an excellent cleaner for the removal of all rosin and no-clean flux types from electronic subassemblies, printed circuit boards and all other electronic components. Flux Remover Heavy Duty will remove the toughest deposits of organic flux, soldering oils and organic handling oils. It also effectively removes other contaminants such as dirt, grease, and molding compounds.

This heavy duty flux remover is suitable to use on printed circuit boards, motors and generators, metal housings, plugs, relays, contacts, switches, surface mount devices and pads.

Features:

- Quickly removes all rosin & no-clean flux types
- Removes encrusted, hard, bakes-on fluxes and residues
- Removes oil, grease, ionic, & non-ionic residues
- Cleans & removes R, RA, RMA & all synthetic flux residues
- Non-abrasive, non-corrosive, non-flammable
- Evaporates quickly and leaves no residue
- Ozone safe: contains no CFC's or HCFC's
- Mild ethereal odor
- 12oz (340g) aerosol can
