Ultra Fast Data Communication Hub Solutions

Running low on USB3 ports on your notebook or desktop? Need to connect multiple USB3 devices at any one time?

Introducing the new **USB3-HB-8P** which builds upon the already successful range of Dynamode USB2 hubs over the past decade. Almost all computer systems have only a few SuperSpeed USB3 hubs and often users have multiple USB3 (and USB2) devices they may wish to connect simultaneously such as backup devices, video adapters, VR headsets and more besides.

Featuring 8 independently switch USB ports complete with status LEDs on each port, multiple USB3 and USB2 devices can be connected and if necessary, data can be exchanged between those connected.

Also featured is a singular charge port for your existing iPad(tm), GalaxyTab(tm) and other digital devices which maybe charged via a USB port, power of which is supplied as standard from the USB3 interface cable, supplied as standard.

specifications:

SuperSpeed USB3.0 - 7 +1 data hub ports

Tablet charging - 1 USB charging for iPad(tm), Galaxy(tm)

Transfer data independently up to 5Gbps on all ports

Ideal for for computers with only singular USB3.0 ports

Independently hub ports - for safety and security

Ideal for notebooks, desktops, media centres and more

Compact and stylish, fits in your bag and self-powered

Compatible with all USB2.0 and USB3.0 peripherals

* Charging maybe dependent
on your existing hardware
