

Hello,

Please review the attached announcement, we are improving our factory efficiency and one of the things we looked at was to manufacture some of our slow moving parts once a year. Rather than having the factory set up multiple times throughout the year to produce these low volume parts, we will start to build a years worth of channel usage once a year. Currently the only parts affected are Arcoelectric parts, the details of the program are in the announcement letter. You may or not be affected by these parts they are all listed in the letter. If you need me to send the list of parts in excel please send me a request. If you have any further questions please refer them to myself or German Casillas. Thank you for your business and continued support.

Please forward this to anyone in your organization that needs to be aware.

Best Regards, David Padilla
