

INSTRUCTIONS: For **Steam Irons**, put solution on cloth and wipe soleplate clean. Fill the tank 3/4 full (about 200ml). Switch iron on and set to max temp. Press steam shot button repeatedly to work the solution through. If the iron has self clean button, press and hold it down. Empty any remaining solution. Repeat process with clean water. **Steam Generator Irons**: Put whole bottle (500ml) in tank. Switch on and allow to come to max temp. Keep steam button pressed until all solution is used. Empty remaining solution and repeat with clean water. **Kettles**: Add all solution (travel kettle add 400ml). If the kettle has a filter remove and drop into solution. Allow to soak for 30 mins. Stir or brush inside if necessary. Rinse with cold water. **Teasmades**: Put 500ml in tank, replace lid. Press TEA NOW button. After boiling repeat with clean water.
