**Change Description:**

Due to low demand with a market that is rapidly moving from Cortex-M3 to Cortex-M4 devices, in combination with the closure of the L-Foundry facility in Rousset, Atmel will discontinue the SAM3N2 and SAM3N4 family and transition our customers to the SAM4 family. The SAM4N and SAM4S devices are cross-compatible products in form, fit and function. These products are in full production and readily available today. These products offer more features, higher performance and lower active power and are complete replacement products in every way; pin compatible, code and functionality.

There is a migration guide that covers this migration in detail and enables users to get the most out of their SAM4 product: AT03786: SAM N/S Series Software Migration Guide
