

Hi Danny,

The attached doc (Compact at Newark) is a list of Compact Time Delays which will be obsolete within a month. There are no replacements for these products. 

In addition, we have new encapsulated THL-8 Time Delay Relays. The THL-8 Series is a digital-set, on-delay relay with universal input voltage and long life and high duty cycle.

<http://www.macromatic.com/products-main/time-delay-relays/encapsulated/thl-8-series>

There are only 3 catalog numbers with time ranges from 0.1 sec to 10,230 sec:

<http://www.macromatic.com/products-main/time-delay-relays/encapsulated/thl-8-series/catalog-numbers>

I have attached the product image and the datasheet for your review. What do you need from me to put these into Newark's stock?

Let me know if you have any questions regarding the obsolescence or the new THL-8 series.

Thank you,
Andrea
