

Global Change Notification (GCN)

Product Family	0.4 BTB J-BEND	10680887
		GCN Number
Series	51338 55909	April 08, 2015
		Date Issued
Reason For Change	Change Construction Or Material	
Change Description	<p>This is to inform you about a change of emboss packing material from PET to PS for 51338/55909 series (0.4 BTB J-BEND). A material manufacturer of Molex's emboss packing terminated PET-material production in March 2015. Following this movement, Molex will shift to use of Molex's standard PS-material emboss and cover tape. There will be no change on its form or thickness of the PS-material emboss(more durable against heat). Also, the manufacturing site of finished goods does not change as the current site. Furthermore, Molex implemented a peeling strength test to find a favorable result. *A color of reels for related products will be united as black-color. *A special mark will be shown on product labels to identify use of PS-material emboss for the first 3 months. The change is scheduled to start on 1st July, 2015.(This date might be changeable due to customer demand or our manufacturing arrangements) Molex would like to collect any customer inquiries or requests possibly by 30th May 2015. The affected items are as follows 513384473, 513385473, 513386461, 513386473, 513389873, 559094472, 559095472, 559096461, 559096472, 559099872(Products with circuit size of 10, 44, 54, 64 only)</p>
