New Capacity Tool for LSR MQS seal

Description of Changes

Due to the recent demand for increased capacity on the LSR MQS wire seal (TE part numbers 967067-1 and 967067-2, TE is building new capacity tool. The new capacity tool will increase productivity and help reduce the backlog and customer past due issues regarding demand. Capacity Tool procedures and testing will follow strict TE protocol outlined in USCAR-2 rev6, LV214 and AAP153. PPAP related request must be received through your local TE sales representative in form of an RTS.

Reason for Changes:

Customer Request. Capacity Tool will meet Fit, Form and Function of how it is used in the end product and designed from the existing production tool.
