Low Light
Videography

Get That Perfect Image From Your Smartphone

Frustrated that your smartphone imaging suffers from camera shake in low light situations?
Need to achieve smoother videography?

The new LMS Data **PH-TRIPD** is the ideal solution for a low price point. Coming in two parts, a universal smartphone holder with a standard 1/4" tripod bush (so you can attach the holder to almost any 3rd party tripod), together with a pocket sized, but highly stable tripod.

Simplicity is the name of the game here, simple adjust the LMS Data holder for your specific model from Apple(tm), Samsung(tm), Google(tm) and many more. Once attached, simply screw on the supplied tripod and take better, sharper images such as in low light conditions, smoothing panning in video, or for that perfect group shot or selfie!

specifications:

Pocket-sized, high quality smartphone & tripod bundle

Universal smartphone* holder for a secure grip

Standard 1/4" tripod bush for use with any tripod

Highly stable, pocket tripod with key adjustment points

Ideal for almost all smartphones - Apple(tm), Samsung(tm)

Take sharper images in all lighting conditions

Create perfectly smooth hi-res video with precise panning

Ideal for literally all users!
