

## **SupaBond No Gun Descriptive Text**

**SupaBondNoGun is the latest in hybrid polymer adhesive technology. Unlike traditional adhesive cartridges, which require a mastic gun, SupaBondNoGun utilizes a pressurized canister making it extremely accurate to use, allowing you to leave a controlled bead of sealant with ease on any application.**

**SupaBond can be used for the following 3 applications:**

- 1. As an adhesive**
- 2. As a sealant**
- 3. As a Filler**

**SupaBond unlike traditional silicone, contains 0% VOC's (Volatile Organic Compounds) meaning it is a very environmentally safe product, but also means it is guaranteed to:**

- Never Shrink**
- Never Crack**
- Can even be used under water**
- Never Discolor (Always stays Perfect White)**
- UV Resistant**
- Vibration Resistant**
- Odorless**
- Remains Permanently Flexible**
- Solvent Free**
- Waterproof**
- Paintable (Any type of paint including water based)**

## **As an Adhesive**

SupaBond can be used for bonding nearly all materials including the following:

1. Metals (All Metals)
2. Wood (All Wood)
3. Ceramics
4. Plastics
5. Lead
6. Ashfelt Roofing
7. Glass
8. Rubber
9. Stone
10. Concrete
11. Granite
12. Marble

SupaBond gives an instant grab when used as an adhesive allowing you to be able to bond items vertically without any concern.

Once fully cured SupaBond gives an incredibly strong bond leaving a permanent fixing.

SupaBond is fully cured within 24hrs of application.

SupaBond is the perfect adhesive for bonding the following:

1. Skirting Boards & Architraves & Coving
2. Bathroom (Including Toilet Roll Holder, Mirror, Tiles)
3. Furniture
4. House Plaques/Numbers
5. Automotive (Trim, Door Cards)
6. Roofing (Slates, Tiles)
7. Fascias & Soffits

## **As a sealant**

**SupaBond is the perfect sealant for sealing the following:**

- 1. Showers, Baths & Sinks**
- 2. Guttering**
- 3. Swimming Pools**
- 4. Ponds**
- 5. Leaking pipework**

**Traditional silicone has the tendency to discolor and crack over time but SupaBond will always stay perfect white when used as a sealant, making it ideal for sealing bathroom appliances.**

**SupaBond can be applied in the wet and even underwater, making it the ultimate sealant.**

## **As a filler**

**SupaBond is the perfect filler for filling the following:**

- 1. Cracks (Wall, Ceiling, Stairs, Floors, Coving)**
- 2. Holes (Wall, Ceiling, Stairs, Floors, Coving)**

**SupaBond can be spread over the cracked area and then painted over with any type of paint. (Including Water Based)**

## **To Use**

**Screw on the application nozzle until tight.**

**Using a precision knife or scissors cut off the end of the plastic tube to the desired angle.**

**To start the flow of SupaBond, simply push the nozzle in any direction bringing it off center.**

**The SupaBond will then automatically start to flow out of the cut nozzle.**

**The further you push the nozzle the faster the flow.**
