

Product Change Notification

TRIMPOT® TRIMMING POTENTIOMETERS

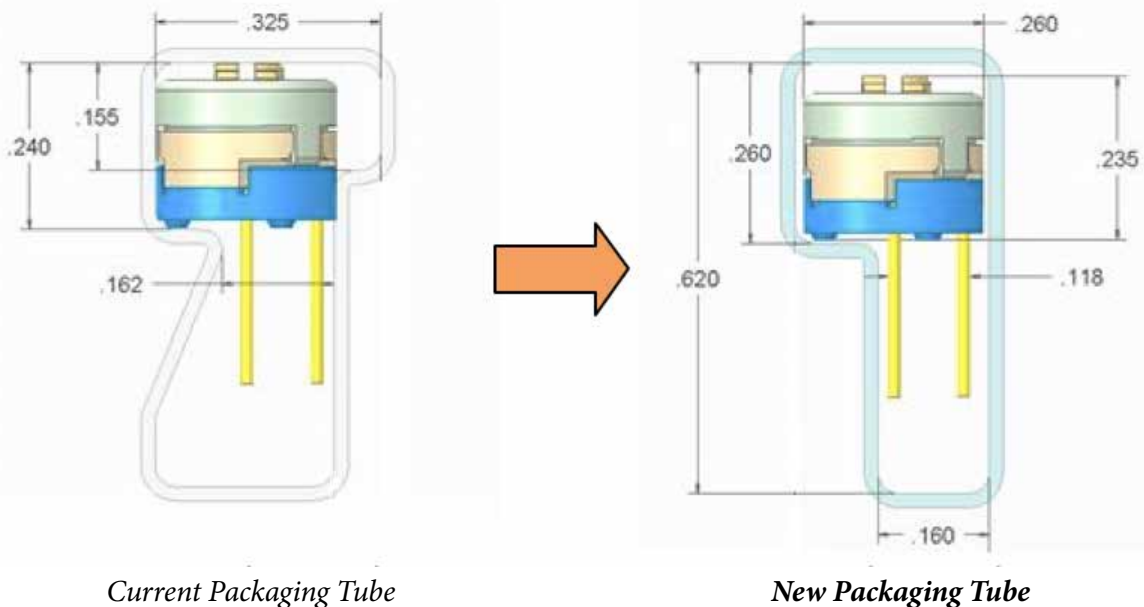

May, 2016

Bourns® Model 3329P-DK9, PV32P, RJ50, and RJR50 Round Trimming Potentiometers *Change to Packaging Tube*

Bourns is pleased to announce an upgrade to the packaging tubes for the [Model 3329P-DK9](#), PV32P, [RJ50](#) and [RJR50](#) Round Trimming Potentiometers. The new packaging tube will be shaped much like the trimmer itself, rather than the less efficient shape that is currently being used.

There are no changes to the form, fit, function, quality or reliability of the trimmers themselves. The packaging tube's fit (physical dimensions) and form (the appearance, such as the shape) will be changed. A list of the affected part numbers is shown in Table 1 on the next page.

Implementation dates are as follows:

Date that manufacturing of existing product packaging will cease: July 26, 2016

Date that deliveries of modified product packaging will begin: July 27, 2016

First date code using above changes: 1631C

If you have any questions or need additional information, please feel free to contact [Customer Service/Inside Sales](#).
