Scope:
To qualify the UTAC assembly site using the QFN package for commercial IC's.

Summary:
This qualification is considered to be passing all environmental stress evaluations per the Allegro MicroSystems, LLC, 900019 Qualification specification for UTAC QFN 3x3, 4x4, 5x5 package family. Qualifications were performed using the 16, 20, 24, 28 and 32 lead QFN packages.

The QFN- Copper-Wire package manufactured at UTAC meets and exceeds the qualification requirements required per JESD47 Stress Test Qualification for Integrated circuits.

Reference Qualification tracking numbers: 2709, 2724, 2792, 2793, 2794, 2795, 2796

Detailed Data: *UTAC QFN Copper-Wire*

Package:	QFN, (square leadless exposed thermal pad) , 0.50 mm pitch
Assembly Location:	UTAC
Mold Compound:	G700LTD
Lead Finish:	100% Tin
Die Attach Material:	8600
Bond Wire:	Copper (CuPd)

Please note: It is our intention to inform our customer of changes as early as possible. Under Allegro's procedure for product/process change notification, Allegro strives, based on its technical judgment, to provide notification of significant changes that may affect form, fit or function. However, as Allegro cannot ensure evaluation of product/process changes for each and every application; the customer retains responsibility to validate the impact of a change on its application suitability. If samples are needed for validation of a change, requests may be made via the contact information provided herein. Please contact your Account Manager or local Sales contact for any questions. We would kindly request your consideration so we can meet our target date for implementation. Unless both parties agree to extend the implementation date, this change will be implemented as scheduled.
