Full 960H Recording

500GB Hard Drive

Weatherproof IP66

Day / Night

This kit is designed to be simple to install and easy to use, so that you can get your system up and running quickly, securing your home and belongings with a minimum of fuss and a fraction of the cost of a professional installation. The cameras are robust and waterproof ensuring years of service in any conditions and with night vision on all cameras, they will ensure you never miss a thing, day or night.

The DVR (Digital Video Recorder) is simple to set up and will record and store weeks of footage on its huge 500GB HDD. You can also access the system via your smartphone or tablet device allowing you to monitor live images or review recorded footage wherever and whenever you are.

## DVR

Our DVR's are designed to be simple to set up and easy to use, with easy to follow guides and intuitive user interface, you can have your system up and working without any previous CCTV experience.

### Facial Recognition

This DVR incorporates facial recognition technology. You can select one channel to recognise faces and it will then automatically capture and store an image of that face, in case it is needed later.

### Easy Installation

With intuitive on-screen set up instructions, you will be able to set up the DVR with little or no previous knowledge

### Full 960H Recording

This DVR records at 960H quality which is almost 5 times the resolution of standard CIF DVR's ensuring that you get crystal clear footage.

### QR Code set up

Simple and quick connection to the internet, allowing remote monitoring of your CCTV system. Simply scan the codes during set up and all connections will be made automatically.

### Remote Monitoring

Simply download our free apple or android app to allow remote access to both the recordings on your DVR and also live streaming.

### Widescreen Footage

960H formatting also means that images are recorded in a widescreen format which suits modern TV's and monitors, meaning images do not get stretched or squeezed to fit on screen.

### Dropbox Connectivity

Connect your DVR to your Dropbox account and store footage safely and securely online, ready for you to access with either your smart device or PC.

### Motion Detection

Set your DVR to be triggered by motion detection, this will allow you to maximise the storage on your DVR by only recording movement, also ensures you dont miss any important events.

### Scheduled Recording

Set the DVR to record at specific times of the day or for set periods when you are at work, away for weekends or on holiday.

### HDMI Socket

Includes HDMI socket to allow direct connection to your TV, meaning there is no need for an additional monitor.

## Cameras

These bullet cameras have been designed to allow easy setup and installation whilst also providing high quality images in most conditions, these are some of the features incorporated.

### Weatherproof IP66

The cameras included in this kit are IP66 rated, this means that they will not let in dust or water, ensuring that they can be used outside without any issues.

### Day & Night functionality

Our cameras are fitted with hi power IR LED's, these allow the camera to record even in total darkness, over a distance of up to 25m!

### Twin Axis

Our bullet cameras work on a twin axis allowing you to pivot the camera through a wide range of angles to ensure you're getting exactly the right shot.

### 1000 TVL

TV Lines are a measurement of how many horizontal lines a camera can create for viewing on a TV or monitor. These cameras produce 1000 TVL which is the equivalent to broadcast quality TV images.

### Anti-Cut Cable Brackets

Our cameras are designed to ensure that the cable is inaccessible, ensuring that no would be thieves or intruders can cut the cable and render the camera redundant.
