

Good Afternoon

Due to exceptionally high demand, we have to push the lead time of our UMT 250 series of SMD fuses out to 16 weeks. Our production lines are running at maximum capacity and we expect that to continue until at least Q3. Our production facility is building new line for the UMT that will increase capacity. Unfortunately until it goes online the extended lead time will be in effect. Please see the attached file for effected part numbers.

Please update your system accordingly and feel free to contact me with any questions or concerns.

Thank you

Best regards,

Nathan Widger  
Vice President, Inside Sales & Supply Chain
