

## Top Gun<sup>TM</sup> & orION<sup>TM</sup> *Revised Ordering Part Numbers*

January 30, 2017

Simco-Ion recently submitted our Top Gun Ionizing Air Gun and orION Ionizing Air Nozzle for updated safety testing at TUV. Both products passed functional safety testing and now carry the TUV Listing mark. Although there are no dimensional, functional, performance or specification changes in the product, we have to change the ordering part number as we have made one user convenience upgrade on the product. The safety fuse which was inside the chassis is now next to the power cord connector for easier access (if needed).

The ordering part number for each model of Top Gun and orION will change with the change in safety fuse access. There will be a -01 added to the ordering part number.

Top Gun example: ordering part number 4005105 (Top Gun 120V, 7' Cable/Hose, NA cord) will now become 4005105-01.

orION example: ordering part number 4009046 (orION 230V, 7' Cable/Hose, EU cord) will now become 4009046-01.

### **There will be no price changes with the change in part number.**

As our inventory is depleted of current Top Gun or orION, Sales Services will request that you change your order to the new part number to help expedite delivery of the product. Please contact Simco-Ion Sales Services at [saleservices@simco-ion.com](mailto:saleservices@simco-ion.com) if you have any questions about this change in part number.
