

High Voltage (Plate) & Filament 300 Series

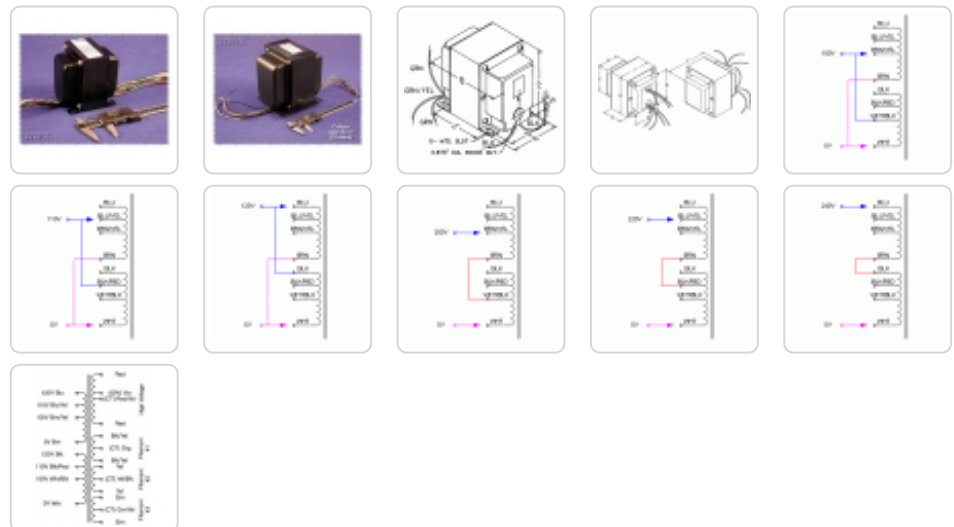

Universal Primary & 50/60 Hz Operation

Features

- Primary: Universal - 100, 110, 120, 200, 220, 240 VAC 50/60 Hz.
 - NOTE: units are designed to operate with BOTH primary windings engaged.
 - See primary wiring information under resources.
- Bias Tap: 50 VAC tap from high voltage secondary C.T. (except part number **379WX** - uses a separate 60VAC 0.2 Amp winding).
- Highpot tested: 2,000 VAC
- Faraday Copper Primary Shield: Our electrostatic shield reduces the capacitive coupling from the primary - greatly attenuating higher frequency current coupling to the secondaries (shield is internally grounded to the end bell).
- Windings: Concentric wound for low stray field and low noise.
- Models: This series is an upgrade from our entire **200 Series** range of units PLUS 2 models designed specifically for 300B tubes (Part Number **300BX**) and 2A3 tubes (Part Number **302AX**).
- Finish: Black powder paint to match our 1650 series of output transformers Units can be run full wave bridge or full wave C.T.
- Conservative designs - CSA certified (209651).
- For a more economical, open frame, universal primary - check out our **260 Series**.
- For that "high end" look & feel check out our potted versions - the **300P Series**.

384X	329	1,200V C.T. @ 230mA	50	5V @ 3A	6.3V @ 3A	6.3V @ 3A	-	X15

*Note: 60 VAC winding for bias supply - on our 379WX is a separate winding (maximum current of 200 ma.)

Note: See our PDF Design Guide for rectifier use suggestions.
