MEAS MS8607 SENSOR FOR GROVE SYSTEM
Digital Pressure and Humidity Sensor

The MS8607 provides the necessary hardware to interface the MS8607 digital pressure, relative humidity and temperature sensor to any system that utilizes Grove compatible expansion ports configurable for I²C communication. The MS8607 sensor is a self-contained pressure, humidity and temperature sensor that is fully calibrated during manufacture. The sensor model works in 5V voltage external. The MS8607 is ideal for weather station applications embedded into compact devices and any applications in which pressure, humidity and temperature monitoring is required.

Specifications
• Operating pressure range: 300 to 1200 mbar
• Measures relative humidity from 0% to 100%
• Measures temperature from -40°C to 125°C
• Extended pressure range 10 to 2000 mbar
• Fast response time
• I²C communication
• Very low power consumption

Features
• 4-pin Grove compatible connector
• I²C interface
• Selectable resolution for pressure
• Selectable resolution for humidity and temperature
• Parameters stored on chip

Performance
• Pressure range: 300 to 1200 mbar
• 0% to 100% relative humidity range
• -40°C to 125°C temperature range
• Operates 5V
• Absolute Pressure accuracy ±2mBar (25°C)
• Absolute Humidity accuracy ±3%RH (25°C, 20-80%RH)
• Absolute Temperature accuracy ±1°C (-20…+85°C)

Connector Pin Assignments (I²C Communications)

Dimensions (mm)
Detailed Description

I²C Interface:
The MS8607 Grove compliant module can interface to the host in I²C model with 5V supply, it has a Grove compatible four pins port connector configured for I²C.

External Control Signals 5V supply:
The IC operates as an I²C slave using the standard 2-wire I²C connection scheme. As IC is power rated at 3.6V, the board integrates necessary fixture such as a regulator and electrical level shift so that the SCL and SDA signals could be driven directly from an external 5V I²C lines and power supply.
