

POWER TRANSFORMER PC MOUNT: SPLIT PACK

F24-100

Description:

The F24-100 is a single primary and dual secondary, split bobbin design which operates with an input of 115V. The output voltage will be either 24.0V with a center-tap under a 0.1A load with the secondaries wired in series, or 12.0V under a 0.2A load with the secondaries wired in parallel. The split bobbin design eliminates the need for costly electrostatic shielding.
