Ultimate Connectivity

AV SNAP-IN MODULAR RANGE

Featuring back boxes, faceplates & various snap-in modules

Universal AV Snap-in Modular Range...
Ideal for installing and concealing AV cables within walls or trunking. You have the freedom & flexibility of choosing the connection combinations you require to create your own specific set-up.

The Snap-In Modules feature a socket on the front of the plate and a female socket on the reverse via a trailing cable. No soldering required!

The installation will consist of...
Single or double back boxes surface mounted onto a wall. Relevant faceplates are screwed to the back boxes and your chosen modules simply snap into the faceplate. Any unused space can be filled with a blanking plate.

Cables from the AV devices such as a Television, Projector, Speaker or Whiteboard are plugged into the female socket on the reverse of the module and generally concealed in trunking.

This completes the AV Snap-In Modular System and it is now ready for the user to plug cables from their Desktop PC, Tablet PC or Laptop into the front of the AV Modules. Installation couldn't be easier!

This system is ideally suited to classrooms, conference rooms & meeting rooms.

THE BENEFITS
Creates a simple connection between your PC & AV Device

Ensures a tidy environment - cables from the AV Devices are concealed behind trunking

Easy to install meaning reduced installation time and expense

DESKTOP PC OR LAPTOP

Cables from the Desktop PC, Tablet PC or Laptop plug into the sockets on the front of the snap-in modules

Cables from the Television, Projector or Whiteboard plug into the sockets on the rear of the snap-in modules

TELEVISION, PROJECTOR, SPEAKER OR INTERACTIVE WHITEBOARD

BACK BOXES, FACEPLATES & SNAP-IN MODULES
Create a custom made/mix & match set-up specific to your requirements
