

615708 CRIMP TOOL (M22520/1-01) LARGE

Item Overview

- Qualified to MIL-DTL-22520/1-01, 8-step, 8-indent precision crimp tool
- Full cycle-controlled ratchet
- Crimps wire barrel sizes 12 through 20
- Compatible with turret and single position heads for consistent crimp location

Description

Standard 8-Step Adjustable Crimp Tool designed to be used with a turret head, a positioner or a universal head. These heads are easily attached with the use of built in hex socket screws. A data plate is permanently attached to each head. The data plate lists the contacts, for which the head was designed, along with selector settings that correspond to the wire being used.

Astro recommends that all of its tools be gaged periodically, to assure accurate calibration. A gage 615716 (M22520/3-1) is available for this purpose.

A wide variety of Turret Heads and Positioners are available. Please contact us for additional information.
