Take That Perfect Selfie...Without Dropping Your Device!

Looking for a better grip on your expensive Smartphone, especially in awkward positions? Need to take a hands-free selfie?

The exciting **PH-FNG-STRP** might just be the answer. Using a patent-pending finger loop design which quickly and securely adheres to the rear of your phone, phone case or other phone cases*, the finger loop is easily adjustable to all hand sizes and is ideal for all ages and industrial applications too.

Moreover the self-contained, built-in bipod can be folded out to allow the phone to be angled on a desk or flat surface, ideal for taking not just selfie's but also maybe watching a movie, using Skype(tm) or even using a Bluetooth(tm) keyboard to type an email.

Ideal for almost all smartphones from leading vendors including Apple(tm), Samsung(tm), LG(tm), Sony(tm) and Google(tm).

specifications:

Avoid your smartphone slipping from your hand

Secure 1, 2 or 3 adjustable finger-loop system

Built-in flip out bipod to angle your device on a surface

Ideal for selfies, watching movies and video conferencing

Easy to apply adhesive system, apply in around 30 secs*

Ideal for industrial, medical, seniors and younger users

Works with almost all smartphone designs on the market

* Adhesive may not be compatible with textile and some gel cases
