

168 pages, illustrated. The PIC Cookbook is the first in a series of application orientated technical work books from Nigel Gardner (author of the best seller Beginners Guide series) and Peter Bernie (UK based embedded system design consultant).

- This volume works through a series of applications of varying complexity from basic to advanced ideas
- Each design idea discussed is accompanied by code examples provided on the accompanying 3.5 inch floppy diskette
- Ideas include:
 - Magnetic card reader
 - Radar speed sensor
 - Radio control system
 - Mains frequency indicator
 - Traffic light sequencer
 - Boat/caravan intruder alarm
 - PIR security system and many more
- An ideal follow on volume for those people having successfully used the 'Beginners Guide to the Microchip PIC'
