

Description

Dual wall heat shrinkable tube is made of the high quality polymer (out layer) with hot melt adhesive (inner layer). The inner layer begin to melt and flow, when exposed to heat source. When it cools down, inner layer forms an adhesion layer between the tubing and the component or wire. Provides a water-tight seal and protection for the connectors or wires.

This kind of heat shrink tube offers super environmental protection for a wide assortment of electronic wiring components, including wire splices, wire and cable bundles, and harness breakout in automotive, truck, and marine cable and other industrial fields.

Technical data

Material	: Polyethylene and hot melting adhesive
Shrinking Ratio	: 3:1 or 4:1
Operating Range	: -45°C to +125°C
Longitudinal Shrinkage	: $\leq 8\%$
Standard Colour	: Black
Cutting Tool	: Heat gun, Oven
