Adapting A Networks SIM To Your Devices

Have the latest smartphone or 3G/4G enabled tablet computer and need to adapt your network's current SIM?

The new LMS Data **PH-SIMADT** is a universal kit that will convert your current Nano SIM adapter to work with larger SIM slots seen in the latest mobile devices such as smartphones, tablets, 3 or 4G routers and much more besides.

Supporting MICRO or STANDARD sized SIM adapters for your current NANO-styled SIM, the kit includes both scratch and impact resistant materials, the adapter is designed to fit popular devices including devices from Apple(tm), Samsung(tm), Microsoft(tm) and more besides.

specifications:

Convert any NANO SIM to either MICRO or STANDARD

Supplied with high-quality SIM EXTRACTOR TOOL

Snap & Fit design - use your current SIM on any device

Impact and scratch resistant design - protects your SIM

Ideal for the latest Apple(tm), Samsung(tm) and Microsoft(tm)

Smartphones, Tablets and other GSM enabled devices

* Smartphone/Tablet not supplied
