Charging Your Digital Lifestyle Devices - Anytime

Finding your current portable USB charger is not going the distance with your power hungry digital devices?

The new LMS Data **PBK-10000** is a new generation of ultra-compact and pocketable charge stations for current and next generation high-drain digital devices such as digital cameras, HD GPS, larger tablet computers and smart watches.

Using a super-performance, 10000mAh battery chemistry means you can be assured effective charging for even the largest portable, digital devices you might have.

Utilising a triple, 1-Amps and 2-Amp USB charge ports, allowing for dual-charging capability with charge protection for your expensive devices.

Finally, an easy-to-read LED charge status display allows at a glance visual check, together with an high-intensity LED light, ideal for any emergency situations.
