Catalog symbol:

· OSCP

Description:

A configurable fusible panelboard for commercial/industrial branch or service entrance applications on systems up through 600Vac.

The Quik-Spec Coordination Paneboard (QSCP) is especially designed to address the NEC[®] selective coordination requirements for emergency, legally required standby, critical operations data systems and Critical Operation Power Systems (COPS) per NEC[®] 700.28, 701.27, 645.27 and 708.54. The QSCP is configured to order for the application. To confirm availability of options and constructions, contact your Bussmann series representative.

Ratings

- Volts:
 - 600Vac, 125Vdc ≤ 80A
- · Amps:
- · 30, 60, 100, 200, 225, 400A
- · SCCR:

· See Panelboard Short-Circuit Current Ratings table

Agency information

- UL[®] 67 standard for panelboards
- · UL 50/UL 50E enclosures for electrical equipment
- cULus to CSA Standard 22.2, No. 29-M1989 panelboards and enclosed panelboards
- UL Listed, Class CTL panelboard
- Uniform Building Code (UBC) and California Building Code (CBC) Seismic Qualified, and IBC[®] Approved

Main options

- Main Lug Only (MLO)
- Non-fused main disconnect
- Fused main disconnect

Branch disconnect options

1-, 2- and 3-pole 15, 20, 30, 40, 50, 60, 70, 90 and 100A ampacity rejecting branch disconnects (see table on page 3 for details). Ampacity on 125Vdc panels \leq 80A. Contact factory for details.

Branch circuit positions

18, 30 and 42

Neutral options

Unbonded and bonded 200A, 400A and 800A

Ground options

Isolated and non-isolated

Enclosures:

NEMA[®] 1 and NEMA 3R

Spare fuse compartment

· Six space spare fuse compartment standard on all models

Quik-Spec Coordination Panelboard (QSCP)

30-400A fusible panelboards

Average NEMA 1 QSCP weights*

- · 18 circuit: 80 lbs (36kg)
- · 30 circuit: 100 lbs (45kg)
- · 42 circuit: 110 lbs (50kg)

* Weight varies by options chosen. If needed, consult factory for exact weight.

CCPB horsepower ratings

* CCPB disconnect can accept CUBEFuses with amp ratings less than or equal to the amp rating of the CCPB disconnect.
 ** Correct fit with CCPB disconnect requires indicating CUBEFuses with date code R38 or later.
 † Available for a bus rating of 225A or higher.

Effective June 2016

Enclosure types:

NEMA 1

- Flush or surface mount
- Galvanized steel with removable end walls - blank or with knockouts to order
- Box sizes: 20" W x 5.75" D x 33", 50", 59" or 69" H (510 W x 145 D x 838, 1270, 1500 or 1753mm H). Box can be rotated 180° to accommodate conduit feed
- Enclosure and chassis mounting instructions are found in supplied literature
- Chassis mounts directly onto studs in the enclosure
- Trim finished with gray powder coat paint over phosphatized steel (ANSI 61)
- Door and door-in-door configurations with locks
- · Door locks use key #2A1910-2
- Circuit directory card is located on the inside of the door
- Trim screws are concealed

NEMA 3R

- · Surface mount only
- Finished with gray powder coat paint over phosphatized steel (ANSI 61)
- Bottom feed only, no knockouts
- Box sizes: 20" W x 7.7" D x 34.5", 51.5", 60.5" or 70.5 H (510 W x 195 D x 876, 1310, 1535 or 1791mm H)
- Enclosure and chassis mounting instructions are found in supplied literature
- Chassis mounts directly onto studs in the enclosure
- Gasketed door has vault handle with lock
- Door locks use key #2A1910-1
- Circuit directory card is located on the inside of the door

DC Applications

Panel bus configured for DC applications, MLO option only, CCPB 125Vdc \leq 80A

Busing:

The busing features tin-plated copper with sufficient cross section to meet UL 67 temperature rise requirements.

Distributed 1- and 3-phase busing

All CCPB branch disconnects can be mounted in any branch circuit position.

≤ 200A main lugs for 60/75° Cu/Al conductors:

Main mechanical lugs

- $\cdot \leq$ 60A panels
 - 2-4AWG, torque 50 Lb-In (5.6 N•m)
 - 6-10AWG,
 - torque 40 Lb-In (4.5 N•m) 12-14AWG,
 - torque 15 Lb-In (1.7 N•m)
- > 60 to 200A panels
- 300kcmil-1AWG, torque 375 Lb-In (42 N•m)
- 2-6AWG, torque 275 Lb-In (31 N•m)

Main sub-feed mechanical lugs

≤ 200A panels,
 300kcmil - 6AWG,
 torque 275 Lb-In (31 N•m)

Smaller lugs for \leq 60 amp panels not available.

Main compression (crimp) lugs*

- ≤60A panels, 8AWG-1/0
- · >60A panels, 300kcmil-4AWG

225-400A main lugs for 60/75° Cu/Al conductors:

Main mechanical lugs

Main barrier cover open wire, 600kcmil-4AWG, torque 500 Lb-In (56 N•m)

Main sub-feed mechanical lugs

Main barrier cover open wire, 600kcmil-2AWG, torque 375 Lb-In (42 N•m)

Main barrier cover open wire, 600-250kcmil

Feed-through lugs

lugs*

Compression, mechanical and double (sub-feed) lugs are all available as feed-through lugs except if Surge Protective Device (SPD) or loadside disconnect options are chosen. Lug ampacity ratings will be based upon panelboard ampacity rating.

225-400A loadside fused disconnect available on:

- · 18 and 30 branch position MLO
- 18 branch position non-fused main disconnect
 Switch amps: 200

Mechanical lugs

- 300kcmil-1AWG, torque 375 Lb-In (42 N•m)
- · 2-6AWG, torque 275 Lb-In (31 N•m)

Fuse mounting torque: 40 Lb-In (4.5 N•m)

- * Versa-Crimp® VC-6 crimp tool recommended for wire crimping.
- ** Not available with Surge Protective Device (SPD) option.

30-100A main disconnects for 75°C Cu conductors:

30-100A fused main disconnects (CCP), 1- and 3-phase

Not available with DC ratings

- 18-10AWG single and dual, torque 20 Lb-In (2.2 N•m)
- \cdot $\,$ 8-6AWG single and dual, torque 35 Lb-In (3.9 N•m) $\,$
- 4AWG single, torque 35 Lb-In (3.9 N•m)

70-200A main disconnects for 75°C Cu conductors:

Fused main disconnect, 1- and 3-phase

Not available with DC ratings

- 300kcmil-4AWG, torque 200 Lb-In (23 N•m)
- Fuse mounting torque: 40 Lb-In (4.5 N•m)

Non-fused main disconnect, 1- and 3-phase

Not available with DC ratings 300kcmil-4AWG, torque 200 Lb-In (23 N•m)

225-400A main disconnects for 75°C Cu conductors:

Fused main disconnect, 1- and 3-phase

Not available with DC ratings

- 600kcmil-2AWG, torque 375 Lb-In (42 N•m)
- Fuse mounting torque: 40 Lb-In (4.5 N•m)

Non-fused main disconnect, 1- and 3-phase *Not available with DC ratings*

600kcmil-2AWG, torque 375 Lb-In (42 N•m)

Neutral assemblies for 60/75°C Cu/Al conductors:

200A Unbonded

- Main terminal 300kcmil-1AWG, torque 375 Lb-In (42 N•m)
- Branch connections see table
- Bar material: aluminum

200A Bonded

- Main terminal 300kcmil-1AWG torque 375 Lb-In (42 N•m)
- · Branch connections see table
- · Bar material: aluminum

400A Unbonded

- Main terminal 600kcmil-4AWG, torque 500 Lb-In (56 N•m)
- Branch connections see table
- · Bar and lug material: aluminum

400A Bonded

- Main terminal 600kcmil-4AWG, torque 500 Lb-In (56 N•m)
- Branch connections see table
- Bar and lug material: aluminum

800A Unbonded

- Main terminal (2) 600kcmil-4AWG, torque 375 Lb-In (42 N•m)
- · Branch connections see table
- · Bar and lug material: aluminum

800A Bonded

- Main terminal (2)600kcmil-4AWG, torque 375 Lb-ln (42 N•m)
- Branch connections see table
- · Bar and lug material: aluminum

Neutral and Ground Assembly Installation:

To facilitate installation and wiring, both neutral and ground assemblies can be installed on either side of the chassis with the desired orientation using the supplied screws. Assembly torque 25 Lb-In (2.8 N•m)

Ground and neutral bar wire connections:

Wire	Torque	Maximum number of wires per open		
AWG*	Lb-In (N•m)	Neutral	Ground	
Small op	pening			
14	25-35 (2.8-3.9)	2	2	
12	25-35 (2.8-3.9)	2	2	
10	25-35 (2.8-3.9)	2	2	
8	30-40 (3.4-4.5)	1	1	
6-4	35-40 (3.9-4.5)	1	1	
Large op	pening			
14	25-35 (2.8-3.9)	3	3	
12	25-35 (2.8-3.9)	3	3	
10	35 (3.9)	3	3	
8	30-40 (3.4-4.5)	1	1	
6-4	35-40 (3.9-4.5)	1	1	
3-1/0	40-50 (4.5-5.6)	1	1	

* 60/75°C, Cu/Al.

Ground assemblies for 60/75°C Cu/Al conductors:

Isolated

Wire range and torque - see table Bar material: aluminum

Non-isolated

Wire range and torque - see table Bar material: aluminum

Surge Protection Devices (SPDs):

Factory installed BSPM_ three module SPD

Optional remote

Description

Factory installed SPDs are the Bussmann® series 3-pole UL modular surge arresters for 240 and 480 3-phase Delta, and 120/208, 277/480 and 347/600Vac 3-phase Wye systems feature local, easyID[™] visual indication and optional remote contact signaling. The unique module locking system fixes the protection module to the base. Modules can be easily replaced without tools by simply depressing the release buttons. Integrated mechanical coding between the base and protection module ensures against installing an incorrect replacement module.

Code requirement for Surge Protective Devices

2014 NEC® 700.8 requires a listed SPD to be installed in or on all emergency system switchboards and panelboards. All configurations of the OSCP intended for installation on an AC circuit can be ordered with an optional SPD to comply with this requirement.

The factory installed three-module SPDs feature local, visual easyID[™] status indication and can be specified with a remote Form C contact relay for integration into a monitoring system. The relay is rated to 250Vac/0.5A and 250Vdc/0.1A, 125Vdc/0.2A, 75Vdc/0.5A to accommodate many signaling needs.

Although a Type 1 SPD may be retrofitted and added externally to meet the NEC[®] 2014 700.8 or other surge suppression needs, it is recommended to factory order the SPD to assure correct specification for the system voltage and type, as well as proper installation.

If an SPD is required after the QSCP is installed (for surface mount QSCPs only), Eaton recommends installing the externalmount Type 1 SurgePOD[™] HEAVY DUTY (50kA I_{max} surge current capacity) or the Type 1 or Type 2 BSPD (from 120kA up to 400kA I_{max} surge current capacity) SPDs.

Care should be taken to order the correct SurgePOD HEAVY DUTY catalog number or specify the correct BSPD (from the catalog number system) to match the electrical system type and voltage.

Features

- Heavy-duty zinc oxide varistors for high discharge capacity
- Module locking system with module release button make module replacement easy without tools
- Up to 200kA Short-Circuit Current Rating (SCCR) make higher assembly SCCR ratings possible
- Optional remote signaling of all protection modules make status monitoring easy and accurate in any monitoring scheme
- Vibration and shock tested according to EN 60068-2 to withstand harsh environments

Optional remote contact signaling

The remote contact signaling versions have a floating changeover contact for use as a break or make contact, according to circuit concept.

Surge protection option precludes feed-through lug and loadside disconnect options.

Available factory installed SPDs:

System and voltage	Catalog number	Data sheet No.
Single-phase, 120/240	BSPM2240S3G	2150
Three-phase Wye, 208/120	BSPM4208WYNG	2152
Three-phase Wye, 480/277	BSPM4480WYNG	2152
Delta, 480	BSPM3480DLG	2151

See data sheets for specifications.

Optional field-installable SPDs

SPH50SP_

SurgePOD HEAVY DUTY is a Type 1 UL Listed SPD with a 50kA surge current capacity. Field installed device, does not ship with QSCP. Must be ordered separately.

BSPD

BSPD includes UL Listed Type 1 or Type 2 SPDs (depending on the configuration ordered) with surge current capacities from 120kA to 400kA and are configurable for Wye (120/208, 277/480, 600) and Delta (240, 480, 600) systems. Field installed device, does not ship with QSCP. Must be ordered separately.

* CCPB disconnect can accept CUBEFuses with amp ratings less than or equal to the amp rating of the CCPB disconnect.

** 1 and 3 amp indicating CUBEFuse not available. Correct fit with CCPB disconnect requires indicating CUBEFuse with date code R38 or later.

† Available for a bus rating of 225A or higher.

Fuse and disconnect performance data:

CUBEFuse specifications:

Catalog symbols	Description
TCF_	6-100A, time-delay, indicating version
TCF_RN	1-100A, time-delay, non-indicating version)
FCF_RN	1-100A, fast-acting, non-indicating version)

Description

The CUBEfuse is a finger-safe, dual-element, time-delay or fast-acting UL Class CF power fuse with Class J electrical performance characteristics.
