

Burglar Stopper® Wire-Free Home Protection System

STI-WS100SG2

PRODUCT OVERVIEW

The Wire-Free Home Protection System, with high quality security and user-friendly features, secures your home or office. The system is controlled by a Smart Panel which receives information from wireless sensors placed in various locations throughout your home. If the Smart Panel detects a security breach, the indicator lights and audible alarms are triggered.

HOW IT WORKS

Door/Window Sensor (STI-WS102)

Panel alerts when sensor detects a protected door or window is opened. It protects access points around the home including those on or in garages, liquor cabinets, medicine cabinets, sheds, attics, side doors and freezers. Magnetic sensor can be mounted on right or left side of door or window.

PIR Motion Sensor (STI-WS103)

Motion sensor protects areas around the home. Any number of sensors can be added and it is ideal for a wide range of areas including rooms, hallways, stairwells, sheds, front and back doors. Has a 120° wide-angle detection zone and includes an all-directional mounting bracket.

Garage Door Sensor (STI-WS105)

Smart panel alerts when the sensor detects an "up-and-over" garage door is opened, sending a signal to the smart panel. It protects access points around the property and is ideal for use on raised/lowered style doors.

Inactivity Sensor (STI-WS107)

Panel alerts when sensor detects no activity is occurring in a property. Ideal for the older or more vulnerable person living independently. Selection of 12 or 24 hours.

Outdoor Bell Box (STI-WS109)

Unit has a super bright strobe light and a powerful 120 dB siren when activated by the Wire-Free Home Alarm. Ideal placement for the box is outside in a highly visible location at the front or rear of the protected property to deter intruders.

Auto Dialer/Distress Alarm (STI-WS110)

When activated, with the supplied panic remote control key fob, the auto dialer calls family, friends, colleagues or emergency services with a pre-recorded message. It can call up to eight pre-programmed telephone numbers, with a priority option and programmable dialing cycles, to assure your emergency contacts are alerted.

FEATURES

- Quick and easy installation, eliminating the mess and expense of running wires.
- Has eight pre-set security zones and four operation modes - Alarm, Alert, Home and Standby.
- Can be controlled from Smart Panel or key fob remote control (included).
- Up to 490 feet line-of-sight range.
- Back-up battery & low battery notification.
- Full back-up power supply.
- Loud 120 dB+ siren.
