

# ATV212WU75N4

variable speed drive ATV212 - 7.5kW - 10hp -  
480V - 3ph - EMC class C2 - IP55

## Main

|                              |                                |
|------------------------------|--------------------------------|
| Range of product             | Altivar 212                    |
| Product or component type    | Variable speed drive           |
| Device short name            | ATV212                         |
| Product destination          | Asynchronous motors            |
| Product specific application | Pumps and fans in HVAC         |
| Assembly style               | With heat sink                 |
| Network number of phases     | 3 phases                       |
| Motor power kW               | 7.5 kW                         |
| Motor power hp               | 10 hp                          |
| [Us] rated supply voltage    | 380...480 V - 15...10 %        |
| Supply voltage limits        | 323...528 V                    |
| Supply frequency             | 50...60 Hz - 5...5 %           |
| Network frequency            | 47.5...63 Hz                   |
| EMC filter                   | Class C2 EMC filter integrated |
| Line current                 | 11.7 A 480 V<br>14.7 A 380 V   |

## Complementary

|                              |                                                           |
|------------------------------|-----------------------------------------------------------|
| Apparent power               | 12.2 kVA 380 V                                            |
| Prospective line Isc         | 22 kA                                                     |
| Continuous output current    | 16 A 380 V<br>16 A 460 V                                  |
| Maximum transient current    | 17.6 A 60 s                                               |
| Speed drive output frequency | 0.5...200 Hz                                              |
| Nominal switching frequency  | 12 kHz                                                    |
| Switching frequency          | 12...16 kHz with derating factor<br>6...16 kHz adjustable |
| Speed range                  | 1...10                                                    |

|                                     |                                                                                                                                                                                                                                                             |

## Mounting Recommendations

### Clearance

Depending on the conditions in which the drive is to be used, its installation will require certain precautions and the use of appropriate accessories.

Install the unit vertically:

- Do not place it close to heating elements.
- Leave sufficient free space to ensure that the air required for cooling purposes can circulate from bottom to the top of the unit.

### Type A Mounting

## Recommended Wiring Diagram

### 3-Phase Power Supply

A1: ATV 212 drive

KM1: Contactor

Q1: Circuit breaker

Q2: GV2 L rated at twice the nominal primary current of T1

Q3: GB2CB05

S1, S2: XB4 B or XB5 A pushbuttons

T1: 100 VA transformer 220 V secondary

(1) Fault relay contacts for remote signalling of the drive status

(2) Connection of the common for the logic inputs depends on the positioning of the switch (Source, PLC, Sink)

(3) Reference potentiometer SZ1RV1202

All terminals are located at the bottom of the drive. Install interference suppressors on all inductive circuits near the drive or connected on the same circuit, such as relays, contactors, solenoid valves, fluorescent lighting, etc.

### Switches (Factory Settings)

Voltage/current selection for analog I/O (VIA and VIB)

Voltage/current selection for analog I/O (FM)

Selection of logic type

(1) negative logic

(2) positive logic

“PLC” position with PLC transistor outputs

(1) PLC

(1) PLC

2-wire control

F: Forward

R: Preset speed

(2) ATV 212 control terminals

3-wire control

F: Forward

R: Stop

RES: Reverse

(2) ATV 212 control terminals

PTC probe

(2) ATV 212 control terminals

(3) Motor

Analog Inputs

Voltage analog inputs

External +10 V

Analogue input configured for current: 0-20 mA, 4-20 mA, X-Y mA

- (2) ATV 212 control terminals  
(5) Source 0-20 mA, 4-20 mA, X-Y mA

Analogue input VIA configured as positive logic input ("Source" position)

- (2) ATV 212 control terminals

Analogue input VIA configured as negative logic input ("Sink" position)

- (2) ATV 212 control terminals

Derating Curves

The derating curves for the drive nominal current ( $I_n$ ) depend on the temperature and the switching frequency.  
For intermediate temperatures (45°C for example), interpolate between 2 curves.

X    Switching frequency
