ÖLFLEX® 115 CY

Application
ÖLFLEX® 115 CY cables are control cables for occasional flexible use and fixed installation under normal mechanical load conditions. They are among others designed for use in dry, damp or wet rooms. Outdoor use: They may only be installed with UV protection and considering the temperature range. At room temperature they are widely resistant to acids, caustic solutions and certain oils. They are suitable for free, non-continuously recurring movement without tensile load. Continuous operational movements, restricted guidance, usage of these cables in moving cable carriers or on motor drum guidance or under a strain of more than 15 N/ mm² conductor cross-section are not allowed. The screen is a protection against electrical interference.

Application range:
Control units for machine tools, conveyor systems, measurement and control technology, systems for data processing.
