### 1.0 SCOPE.

This specification covers performance, tests and quality requirements for the SIM Card Connector SIM7200 (Hinged Type, 8 Pin, SMT, 1.50mm Profile).

### 2.0 PRODUCT NAME AND PART NUMBER.

SIM Card Connector, 8 Pin, Receiver Type: SIM7200.

### 3.0 PRODUCT SHAPE, DIMENSIONS AND MATERIAL.

Please refer to drawings.

### 4.0 RATINGS.

Current rating ...... 1.0 Amp Max.

Operating Temperature Range ..... -40°C to +85°C

Storage Temperature ..... -40°C to +85°C

### 5.0 TEST AND MEASUREMENT CONDITIONS.

Product is designed to meet electrical, mechanical and environmental performance requirements specified in Paragraph 6.0. All tests are performed at ambient environmental conditions unless otherwise specified.

#### 6.0 PERFORMANCE.

| Item                   | Test Condition   | Requirement   |
|------------------------|--|---|
| Examination of Product | Visual, dimensional and functional inspection as per quality plan. | Product shall meet requirements of product drawing and specification. |

## 6.1 Electrical Performance.

| Item                  | Test Condition   | Requirement                          |
|-----------------------|--|--------------------------------------|
| Contact Resistance    | Insert SIM card into connector, measure and record contact resistance using test a current of 10mA max and 20mV open circuit voltage in accordance with EIA-364-23B. | 100 mΩ Max after test.               |
| Insulation Resistance | Apply 500Volts DC between adjacent contacts of mated SIM card and connector for one minute in accordance with EIA-364-21C.   | 1000 MΩ minimum / 500 VDC            |
| Dielectric Strength   | Insert SIM card into connector and apply 500 VAC for 1 minute between adjacent terminal or ground, in accordance with EIA-364-20A.                                   | No creeping discharge or flash over. |

### 6.2 Mechanical Performance.

| Item   | Test Condition   | Requirement  |
|--|--|--|
| Durability   | The SIM card should be mated and unmated for 5,000 cycles at a rate of 200 cycles/ hour in accordance with EIA-364-09.   | No evidence of physical damage.  Contact Resistance ≦100mΩ at end of test                                |
| Vibration  | Insert SIM card into connector and expose to 10 to 55 to 10 Hz frequency span over 1 minute at a 1.52mm amplitude for a total of 15 minutes. Test to be conducted on 3 mutually perpendicular planes. 100mA Max. Applied. In accordance with EIA-364-28. | No evidence of physical damage  Contact Resistance  ≦100mΩ at end of test  Current discontinuity ≦1 μs   |
| Mechanical Shock                                       | Subject the part to a 490 m/s2 half sine wave acceleration for 11 ms.  Three shocks to be applied in each of the X, Y and Z planes and in both directions.  A total of 18 shocks and in accordance with EIA-364-27.                                      | No evidence of physical damage  Contact Resistance  ≦100mΩ at end of test  Current discontinuity≦ 1 μs . |
| Cover Lock and Unlock<br>Force (SIM Card<br>Installed) | Measure force necessary to mate connector assemblies at a rate of 25±3/Minute In accordance with EIA-364-13B   | Lock Force: 15N Max<br>Unlock Force: 1N Min  |

| Part<br>Number      | SIM7200                  |  |    |         | А  | Date     | 11/04/16 |
|---------------------|--------------------------|--|----|---------|----|----------|----------|
| Product Description | SIM Card Connector, Hing | SIM Card Connector, Hinged Type, 8 Pin, SMT, 1.50mm Profile. |    |         |    |          |          |

## 6.3 Environmental Performance and Others.

| Item                                    | Test Condition  | Requirement  |
|---|---|--|
| Thermal Shock                           | Insert SIM card into connector and perform the following thermal cycle :55±3°C for 30 minutes, +85±2°C for 30 minutes, Transit time will no longer than 5 minutes Repeat for 5 cycles in accordance with EIA-364-32F. | No evidence of physical damage, Contact Resistance $\leq$ 100 m $\Omega$ Insulation resistance $\geq$ 1000 M $\Omega$  |
| Humidity Test                           | Insert SIM card into connector and expose to temperature of 40±2°C with 90-95% RH for 96 hours then place in ambient temperature for 1 to 2 hrs. In accordance with EIA-364-31B.                                      | No evidence of physical damage, Contact Resistance $\leq 100 \text{ m}\Omega$ Insulation resistance $\geq 1000 \text{ M}\Omega$ Dielectric: No creeping discharge or flash over. |
| Salt Water Spray                        | Insert SIM card into connector and expose to 35±2°C and 5±1% NaCl (salt condition) for 8hours. Test in accordance with EIA-364-26A.   | No rust on contact area  |
| Temperature Life (High)                 | Insert SIM card into connector and expose to 85±2°C for 96 hours. Recovery time 1-2 hours. In accordance with EIA-364-17B   | No evidence of physical damage, Contact Resistance $\leq$ 100 m $\Omega$ Insulation resistance $\geq$ 1000 M $\Omega$ Dielectric: No creeping discharge or flash over.           |
| Temperature Life (Low)                  | Insert SIM card into connector and expose to -40±3°C for 48 hours. Recovery time 1-2 hours. EIA-364-59A   | No evidence of physical damage, Contact Resistance $\leq$ 100 m $\Omega$   |
| Temperature Rise                        | Insert SIM card into connector and measure the temperature rise of contact when rated current is passed. In accordance with EIA-364-70 Method 1.  | 30°C Max.  |
| Solderability                           | Dip solders tails into molten solder up to a depth of 1mm, held at a temperature of 245±2°C for 5±0.5 second. In accordance with EIA-364-52   | 95% of immersed area must show no voids of pin holes.  |
| Resistance to Reflow<br>Soldering Heat. | Mount connector, place in reflow oven and expose to the temperature profile with peak temperature of 250°C for 15seconds. See Fig. 1.   | No evidence of physical damage or abnormalities adversely affecting performance.   |
