## Adapting A Networks SIM To Your Devices

Have the latest smartphone or 3G/4G enabled tablet computer and need to adapt your network's current SIM?

The new LMS Data **PH-SIMCUT** is a low cost but effective tool for anyone to adapt their current full-size SIM to fit the latest digital devices. Quality constructed and of course supplied with adapter for converting nano SIMs to full sized SIM enabled devices, if required.

Also, if your current full-size SIM needs to be made into nano-size, no problem. Simply insert your full-size SIM and use the supplied tooling, like a regular office stapler' to re-size the SIM for a perfect fit in nano SIM slots.

Also supplied with a standard SIM ejector tool, invaluable for also any network enabled digital device.
