TL Series

Changes to LED Specifications for TL Toggles with Bright Red (C) or Bright Amber (D)

Type of Change:

- Engineering Part Number
 Product Appearance

LED Specification Revisions for TL Series

The TL Series Illuminated Toggles will have changes to the LED specifications for Bright Red (code C) and Bright Amber (code D) LEDs. The changes will effect all of the switches, including both actuators lengths, and standard and custom devices. The specification revisions are outlined below, followed by effected standard part numbers.

BRIGHT LED COLOR CODES & SPECIFICATIONS

		Before Change		After Change		
Electrical specifications are determined at a basic temperature of 25°C. Lamp circuit is independent of switch operation.	LED Factory Assembled Not Available Separately	Color	5C Red	5D Amber	5C Red	5D Amber
	Maximum Forward Current	I_{FM}	30mA	30mA	30mA	30mA
	Typical Forward Current	I_F	20mA	20mA	20mA	20mA
	Forward Voltage	V_F	2.0V	2.1V	2.05V	2.05V
	Maximum Reverse Voltage	V_{RM}	4V	4V	10V	10V
	Current Reduction Rate Above 25°C	ΔI_F	0.32mA/°C	0.32mA/°C	0.40mA/°C	0.40mA/°C
	Ambient Temperature Range		-10°C ~ +55°C		-10°C ~ +55°C	

Notes

- The LED circuit is isolated and requires an external power source.
- If the source voltage exceeds the rated voltage, a ballast resistor is required. The resistor value can be calculated by using the formula shown here.
- There are no changes to any other specifications or external dimensions.
- Contact the factory if further details are needed.

$$R = \frac{E - V_F}{I_F}$$

Where: R = Resistor Value (Ohms)
 E = Source Voltage (V)
 V_F = Forward Voltage (V)
 I_F = Forward Current (A)

TL Toggles Standard Part Numbers

.689" (17.5mm) Toggle	.433" (11.0mm) Toggle
TL22DCAW015C	TL22SCAG015C
TL22DDAW015D	TL22SDAG015D

Effective Date

Changes to TL Illuminated Toggles with bright Red or Amber LEDs will be effective December 2017.
