

INFORMATION LEAFLET
Please read to get the most out of your keyboard

As standard, when plugged into a USB port the CP-K8800 will not illuminate in most cases, this is normal. To activate the backlit affect on the keys please press SCOLL LOCK.

The SCROLL LOCK key as a small circular light icon, this turns on/off the backlit effect and works independent of the host computer

In most cases no extra keyboard mapping is requiried, however for any key mapping that needs to be done within your operating system please configure as needed your keyboard preferences within your operating system.
