

# NEW SIZES MOUNTING BRACKETS

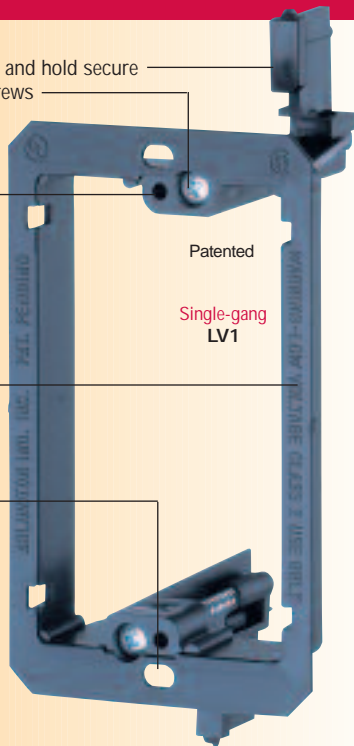

Just for CLASS 2 LOW VOLTAGE WIRING

**"Wings"** flip up and hold secure when Mounting Screws are tightened

**Recessed Screw Hole** seats wall plate flush with wall surface

**Thin Front Lip** seats better on drywall

**Oval Hole** allows for final shifting & straightening of device

Patented

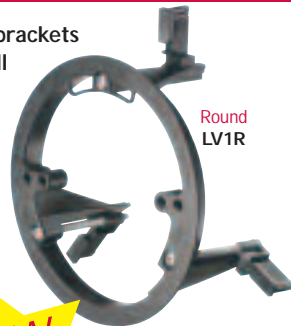

Single-gang LV1

Use Arlington's non-metallic mounting brackets to install class 2 wiring – and to seat wall plates flush with the mounting surface.

In addition to our single gang LV1 – We now have two, three and four-gang styles and the Round LV1R!

For existing construction, our low-voltage mounting brackets...

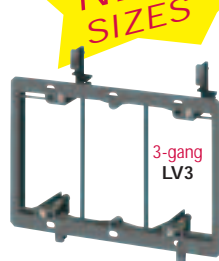

- Adjust to fit 1/4" to 1" thick drywall, wallboard or paneling
- Install faster, and cost less than metal

Round LV1R

4-gang LV4

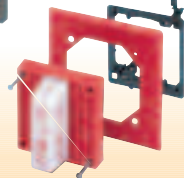

3-gang LV3

2-gang LV2

Try LV2 for low voltage Fire Alarm installations
