1. BEFORE YOU BEGIN

What is Included

- 1 x Mini Strobe LED
- 1 x Warranty Card
- 1 x User Manual

Unpacking Instructions

Immediately upon receiving a fixture, carefully unpack the carton, check the contents to ensure that all parts are present, and have been received in good condition. Notify the shipper immediately and retain packing material for inspection if any parts appear damaged from shipping or the carton itself shows signs of mishandling. Save the carton and all packing materials. In the event that a fixture must be returned to the factory, it is important that the fixture be returned in the original factory box and packing.

Safety Instructions

Please read these instructions carefully, which includes important information about the installation, usage and maintenance of this product.

- Please keep this User Manual for future consultation. If you sell the unit to another user, be sure that they also receive this instruction booklet.
- Always make sure that you are connecting to the proper voltage, and that the line voltage you are connecting to is not higher than that stated on the decal or rear panel of the fixture.
- The unit must be installed in a location with adequate ventilation, at least 20 in (50 cm) from adjacent surfaces. Be sure that no ventilation slots are blocked.
- Always disconnect from power source before servicing or replacing lamp or fuse and be sure to replace with same lamp source.
- Secure fixture to fastening device using a safety chain. Never carry the fixture solely by its head. Use its carrying handles.
- Maximum ambient temperature (Ta) is 104° F (40° C). Do not operate fixture at temperatures higher than this.
- In the event of a serious operating problem, stop using the unit immediately. Never try to repair the unit by yourself. Repairs carried out by unskilled people can lead to damage or malfunction. Please contact the nearest authorized technical assistance center.
- Never connect the device to a dimmer pack.
- Make sure the power cord is never crimped or damaged.
- Never disconnect the power cord by pulling or tugging on the cord.
- Avoid direct eye exposure to the light source while it is on.

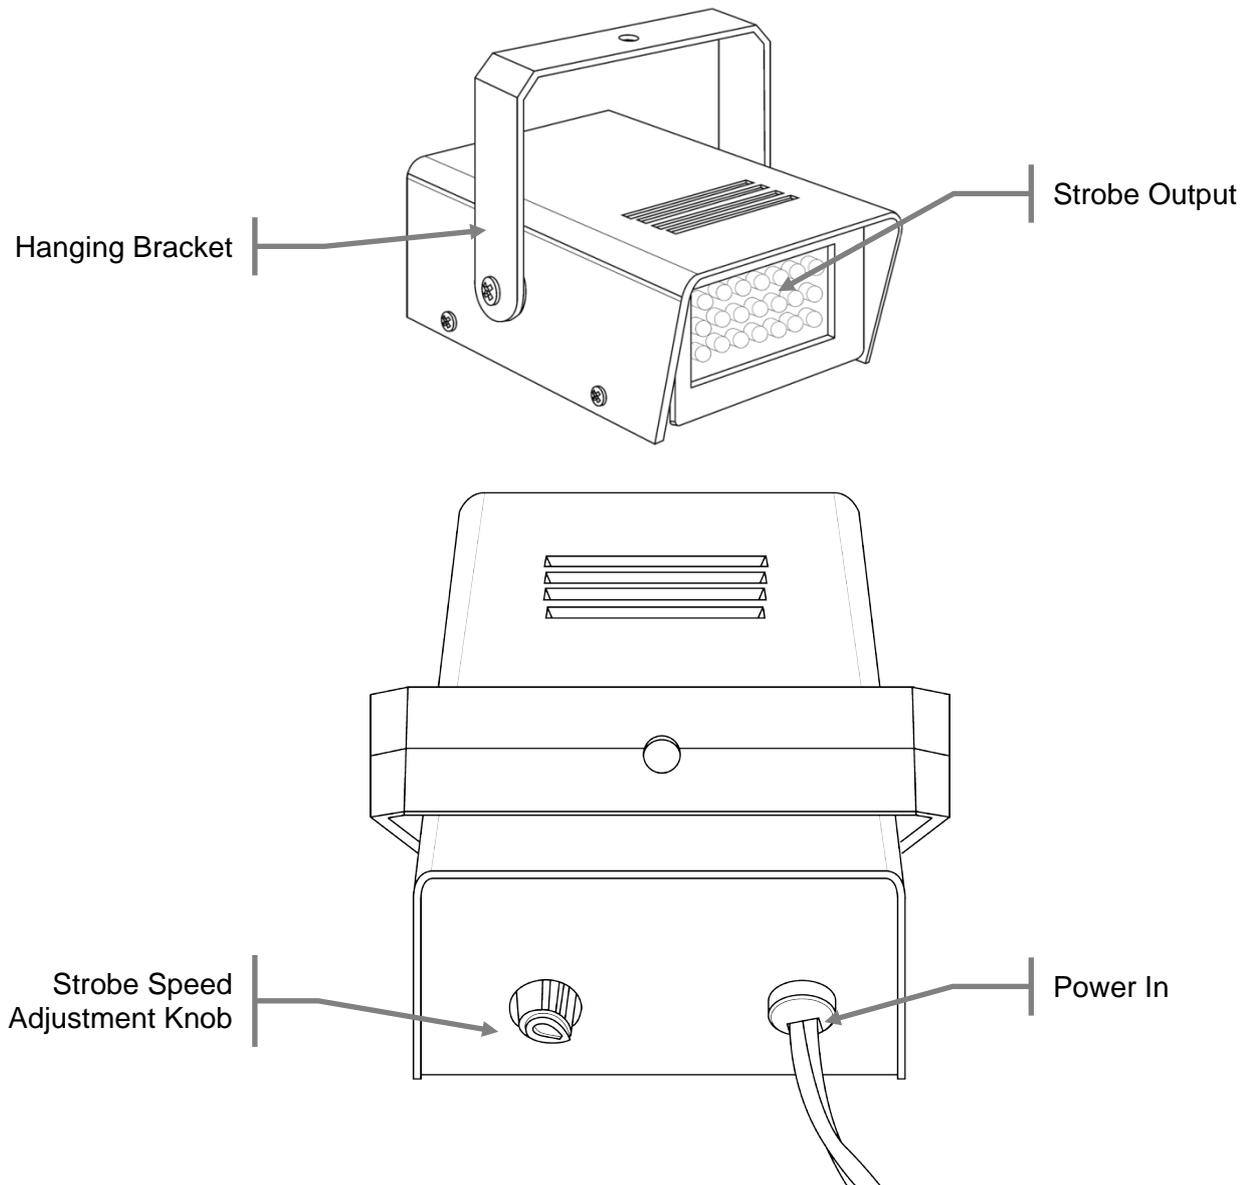

There are no user serviceable parts inside the unit. Do not open the housing or attempt any repairs yourself. In the unlikely event your unit may require service, please contact CHAUVET® at: 954-929-1115.

2. INTRODUCTION

Features

- Ready to go out of the box
- Manually adjustable strobe rate

Product Overview

Turn the strobe speed adjustment knob clockwise to increase the strobe speed.

Turning the speed adjustment fully counter-clockwise does NOT turn off the fixture. It turns it to the lowest setting. It is NOT possible to turn the strobe OFF when plugged into power.

3. SETUP

AC Power

To determine the power requirements for a particular fixture, see the label affixed to the back plate of the fixture or refer to the fixture's specifications chart. All fixtures must be powered directly off a switched circuit and cannot be run off a rheostat (variable resistor) or dimmer circuit, even if the rheostat or dimmer channel is used solely for a 0% to 100% switch. Before applying power to a fixture, check that the source voltage matches the fixture's requirement.

All fixtures must be connected to circuits with a suitable Earth Ground.

Mounting

Orientation

This fixture may be mounted in any safe position.

Rigging

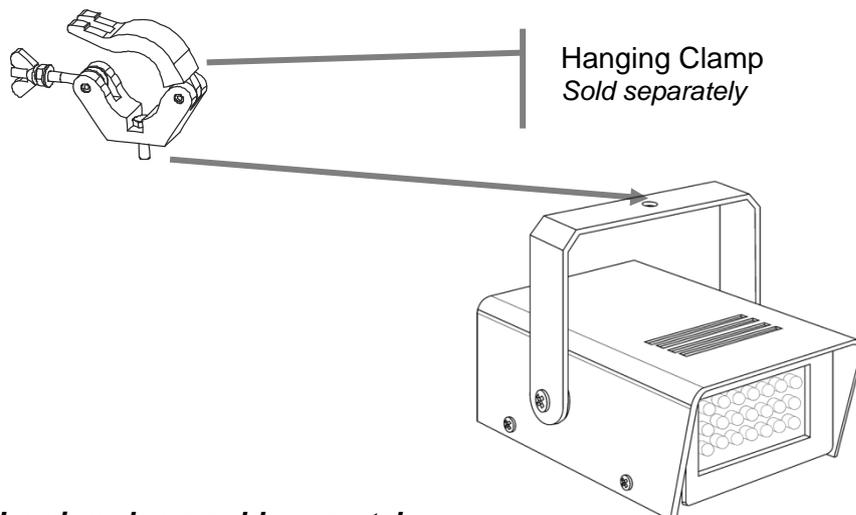

The fixture includes a mounting yoke to which a rigging clamp can be attached. You must make sure the clamp is capable of supporting the weight of this fixture. You can order "C" and "O" clamps from any CHAUVET® dealer or distributor (CLP-02, CLP-10 recommended).

There are 2 types of mounting options for this fixture: floor stand for up lighting, and overhead use for down lighting. You must use at least one (1) safety cable/chain for each fixture in addition to the mounting clamp.

If hanging the fixture for over head use, please follow the steps below.

1. Block access below the work area and use a suitable and stable platform when installing or servicing fixture.
2. Safety cables must always be used. The safety cable must be capable of holding 10 times the weight of the fixture.
3. Verify the structure can hold 10 times the weight of all to-be installed fixtures.

Hanging clamp sold separately.

4. APPENDIX

General Maintenance

To maintain optimum performance and minimize wear fixtures should be cleaned at least twice a month frequently. Usage and environment are contributing factors in determining frequency. Dust build-up reduces light output performance and can cause overheating, leading to reduced lamp life and increased mechanical wear. Be sure to power off fixture before conducting maintenance.

Unplug fixture from power. Use a vacuum or air compressor and a soft brush to remove dust collected on external vents and internal components. Clean all glass when the fixture is cold with a mild solution of glass cleaner or Isopropyl Alcohol and a soft lint free cotton cloth or lens tissue. Apply solution to the cloth or tissue and drag dirt and grime to the outside of the lens. Gently polish optical surfaces until they are free of haze and lint.

The cleaning of internal and external optical lenses and/or mirrors must be carried out periodically to optimize light output. Cleaning frequency depends on the environment in which the fixture operates: damp, smoky or particularly dirty surrounding can cause greater accumulation of dirt on the unit's optics. Clean with soft cloth using normal glass cleaning fluid. Always dry the parts carefully. Clean the external optics at least every 20 days. Clean the internal optics at least every 30/60 days.

Return Procedure

Returned merchandise must be sent prepaid and in the original packing, call tags will not be issued. Package must be clearly labeled with a Return Merchandise Authorization Number (RMA #). Products returned without an RMA # will be refused.

Call CHAUVET® and request an RMA # prior to shipping the fixture. Be prepared to provide the model number, serial number and a brief description of the cause for the return. Be sure to properly pack fixture, any shipping damage resulting from inadequate packaging is the customer's responsibility. FedEx packing or double-boxing are recommended.

CHAUVET® reserves the right to use its own discretion to repair or replace product(s).

Note: If you are given an RMA #, please include the following information on a piece of paper inside the box:

- 1) Your name
- 2) Your address
- 3) Your phone number
- 4) The RMA #
- 5) A brief description of the symptoms

Claims

Damage incurred in shipping is the responsibility of the shipper; therefore the damage must be reported to the carrier upon receipt of merchandise. It is the customer's responsibility to notify and submit claims with the shipper in the event that a fixture is damaged due to shipping. Any other claim for items such as missing component/part, damage not related to shipping, and concealed damage, must be made within seven (7) days of receiving merchandise.

Technical Specifications

WEIGHT & DIMENSIONS

Length.....	5.1 in (130 mm)
Width.....	4 in (102 mm)
Height.....	3.7 in (95 mm)
Weight.....	0.5 lbs (0.2 kg)

POWER

Non-switchable.....	115 VAC, 60 Hz or 230 VAC, 50 Hz
Power consumption @ 120 V, 60 Hz.....	1 W (<0.1 A), <0.1 A inrush
Power consumption @ 230 V, 50 Hz.....	1 W (<0.1 A), <0.1 A inrush

LIGHT SOURCE

LED.....	21 (white) 100,000 hrs.
