Feel-good typing that's built to go the distance

Looking for a cost-effective, general purpose full-size keyboard for the home or office?

The new Compoint **CP-K9014** is your ideal, general purpose keyboard for all your computing tasks, be it home, office or educational use. Featuring a full-size and naturally comfortable design means reduced wrist strain with more productive usage.

Excellent tactile feedback, a separate numeric and cursor pad and of course Windows(tm) specific shortcut keys means you can also increase your workflow in a variety of applications.

Ideal also for the Raspberry(tm)PI project environment whereby a low cost USB keyboard is a necessary requirement and of course excellent tactile feedback with a thin and adjustable profile to help prevent common wrist straining and durable keys with up to a 10-million keystroke lifespan.

Advanced features:

Full-size UK Keyboard with Windows(tm) shortcut keys

Separate cursor pad, numeric pad for better workflow

Thin keyboard profile with tilt legs - helps reduce RSI

Plug n' Play - USB interface with generous cable length

Tactile feedback with up to 10 million keystroke operation

Better workflow at home, the office or for education

Ideal for Windows(tm), Mac OS(tm), Android(tm) and more

Ideal for computer projects such as Raspberry(tm) PI systems

An active USB port is required.
