USB Table Light and pass-through charger (White)

The Integral LED USB Table Light is a compact and versatile light that is ideal for bedside units, night stands, sideboards and bedrooms. The light is powered via a USB socket, which allows it to be charged by a mains adaptor or by drawing power directly from a smart device. The Table Light includes a built-in USB output to charge devices such as smart phones and tablets.

The light is controlled by an intuitive capacitive touch interface and memorises the previous light setting to suit user preferences. A 60-minute timer is included, making the Table Light ideal for children who struggle to sleep in complete darkness, as the light will automatically turn itself off after an hour. The body of the Table Light is attractive and stylish and is available in white or pink. The base of the product uses anti-slip material to keep it stable during use.
