Optical Glow Mouse

Light up your desktop with changing colours

The optical Glow mouse is a comfortable full-size optical mouse that combines functionality with a spectacular look. The special designed shape is ideal for left- and right-hand users and the 800 dpi sensor provides excellent optical precision. The multicoloured LED lights up your desktop area with changing colours and adds a little fun at work or at home. The mouse comes with a PS2 adapter, making this mouse suitable for both USB and PS2. Also available in white version.

Benefits

- Features multicoloured LED's for spectacular colour changing glow.
- Special ergonomic design for comfortable use by both left- and right handed users
- Features an embedded 800 dpi precision optical sensor that requires no cleaning and provides precision tracking on almost every surface.
- Installation: To install the Belkin Optical Glow Mouse, simply plug the USB connector into a free USB port on your computer or hub. The mouse will be detected and installed automatically. Your mouse is now operational.
- Package Includes • Optical Glow Mouse - PS2 Adapter
- System Requirements • Pentium based PC or Macintosh system • USB • Windows 98, 2000, Me, Xp • Mac Os v10.x or higher
