Phase-Out of the grey variants of Fusedrawer 1 and Fusedrawer 3

General

As a result of the approval tests for all fuse holders according to the new standard IEC 60127-6 Edition 2, we are forced to discontinue the production and delivery of all grey versions of the fusedrawer 1 [1] and fusedrawer 3 [2]. The grey plastic material does not meet the requirements of the new standard and the evaluation of a new grey plastic material and its new approvals are not justified.

All open customer orders must be transferred immediately from the grey to the black versions. A cross reference list can be found at the end of this document.

If you have any questions please do not hesitate to contact us.

Kind regards

Albert Bürgler
