

INSTALL MANUAL

BluStream - ISBT52

Initial Setup

BluStream is an easy to use, Bluetooth, hands-free calling and audio streaming solution for your vehicle.

What you will need for this install:

- Smartphone with Bluetooth
- 12volt power outlet aka your vehicle's cigarette lighter port
- Car radio
- Your vehicle's AUX port

What's in the box!

DIY Install Instructions

Step 1. Mount your BluStream module (a) with the included adhesive tape to your vehicle's dash

Step 2. BluStream needs a little power to rock your world, so plug the power source (b) into your 12volt power outlet (cigarette port)

Step 3. Plug the 3.5mm AUX cable (c) to your vehicle's AUX port.

Step 4. Change your input source on your car radio to AUX Input

Step 5. Pair your Bluetooth capable smartphone to BluStream!

How to pair your phone:

- Ensure your smartphone's Bluetooth is on
- Select "BluStream" from your phone's Bluetooth list and select connect (No Pairing Code is required)

Step 1

Step 2

Step 3

Step 4

Step 5

HOW TO USE

What's in the box!

WARNING:

This equipment may be reset by unintentional electrostatic discharge during operation. Exposure to direct sunlight or extreme heat may cause damage or malfunction. FCC Class B Radio Frequency Interference Statement This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

1. Re-orientate or relocate the receiving antenna.
2. Increase the separation between the equipment and receiver.
3. Connect the equipment into an outlet on a circuit different from that of which the receiver is connected.
4. Consult the dealer or an experienced radio / television technical for help.

Notice : The changes or modifications not expressly approved by the party responsible compliance could void the user authority to operate the equipment. This device complies with Industry Canada license-exempt RSS standard(s).

Operation is subject to the following two conditions:

- (1) This device may not cause interference, and
- (2) This device must accept any interference, including interference that may cause undesired operation of the device.
