Premium grade cabling technology for your HDMI devices

Looking for a premium quality HDMI cable solution for critical A/V applications but don't want to spend the Earth?

The new range of LMS Data **HDMI-HDMI** premium cables give users not only the very latest in HDMI performance for video and audio but also feature a robust, triple shielded sheath that makes them ideal for professional usage such as CCTV and professional home theatre installations, whereby a more robust outer jacket is needed. Featuring an integral ferrite core that helps reduce external electrical interferences still further.

Fully compatible with the latest HDMI 1.4 specification and with the capability to transmit data up to around 10Gbps\* means 3DTV, the latest BluRay games and even 4K TV come to life without the inherent cost of some other vendor solutions.

Available in a variety of lengths including the ever-popular 15-metre size, ideal for most A/V applications.

## specifications:

HDMI - HDMI v1.4 specification multimedia cable - 15 metres

**Supports high-speed Ethernet and Audio Return Channel (ARC)**

Supports 10Gbps\* transmissions for 3DTV and 4K TV

**Ideal for next generation game consoles, BluRay and more**

Low-loss cable with ferrite core for increased RF immunity

**Triple shielded with crush resistance outer nylon mesh**

Gold-plated HDMI connectors for better electrical conductance

**Available in multiple length sizes for your A/V applications**

\*actual transmission speeds may vary according to devices used and/or cable lengths
