Amazing Results

UltraFX is a multi purpose oil and grease remover developed to clean tools and machinery that have a build up of dirt and grease. UltraFX is a high powered cleaning solution that gives amazing results when used together with an Ultrasonic Cleaner.

James Products have carefully designed UltraFX to meet the growing demand in the workshop. With engine parts like carburettors being effected by the increased use of re-usable fuels such as ethanol, we needed to provide a more effective tool to give our customers the best results.

UltraFX gives fantastic results within minutes of cleaning

BOTTLE SIZES: 1LTR / 5LTR / 25LTR
