

STEEL CASE: ASSEMBLY

STEP 1: MOUNT THE RASPBERRY PI TO THE BASE

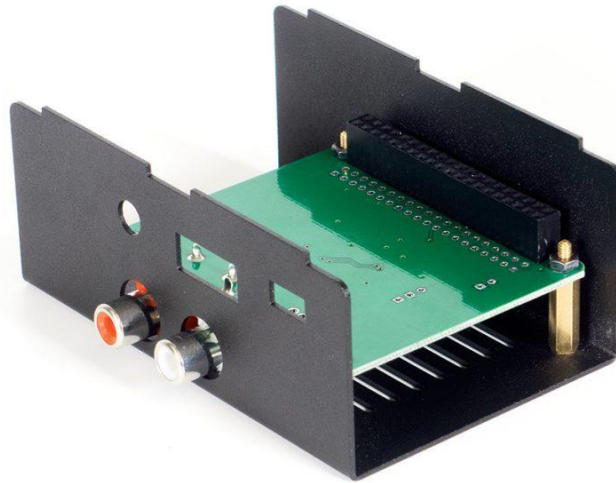

You have to mount the shorter standoffs on the side with the power/HDMI/audio connectors, not on the side with the 40-pin connector.

STEP 2: MOUNT THE LONGER SPACERS ONTO THE HIFIBERRY DAC+

The longer spacers will be mounted on the side with the 40-pin connector.

STEP 3: MOUNT THE HIFIBERRY DAC+ ONTO THE TOP OF THE CASE

STEP 4: SNAP BOTH PARTS TOGETHER

This step is a bit tricky. Make sure that top and base are aligned correctly. The HiFiBerry DAC+ should now slide into the 40 pin GPIO header.

STEP 5: FIX BOTH PARTS WITH THE LONG SCREWS
