

Filter Systems

**FE3000**

FE3000 is an electrically driven filter unit with very low noise level and high suction capacity. The filter unit has inlets for two soldering irons. The unit cleans the process air through a pre filter and a main filter system.

The high effective and reliable filter system guarantees a high separation degree of both particles and gases.

#### TECHNICAL DATA

Max connected soldering irons	2 pcs	Suction capacity	>50 l/m
Height/ Width	33,5/28 mm	Micro filter, separation degree	>99,99 %
Weight	6,7 kg	Gas filter, separation degree	>99 %
Sound level, at 1 meter	42 dB(A)	Voltage	115/240 V

Filter Systems

Filtronic AB is striving to create a better workbench environment by developing and producing particle and gas filter systems of very high quality. The filter systems have a long filter lifetime and low energy costs, are easy install, have a low noise level and a guaranteed function of both gases and particles.
