Cam-Lok™ Single pole connectivity

The industry standard for reliable service
under the most severe operating conditions.

EATON

Powering Business Worldwide

Cam-Lok™ single pole connectivity

Cam-Lok™ connectors: The industry standard

Cam-Lok™ plugs and receptacles are the original cam-style single pole connectivity solution for motors, generators, indoor and outdoor lighting distribution panels, stand-by power and other industrial power applications.

Eaton's Crouse-Hinds Cam-Lok™ single pole connectors are specially designed to provide the ultimate in reliable service, even under the most severe operating conditions.

- Exclusive double cam principle provides a positive, vibration-proof connection.
- Safe and easy assembly with normal hand tools or no tools at all.
- All insulators are molded from colorfast material providing quick and easy phase identification.
- Panel mount receptacles are insulated for direct mounting to steel panels, eliminating the need for costly insulating boards.
- All Cam-Lok™ products are 100% insulated, providing a safe connection.

Cam-Lok™

F-Series product applications:

- Welding
- Patch panels
- Heat treating

Save time and money.

Cam-Lok™ plugs and receptacles replace expensive and bulky multi-conductor cables allowing the use of lighter, single-conductor cables rated at higher amperages. Cam-Lok™ connectors also provide the ability to quickly connect and disconnect without tools.

Cam-Lok™

J-Series product applications:

- Portable power
- Entertainment
- Motors
- Generators

Posi-Lok™

Product applications:

- Power distribution
- Temporary power
- Emergency power

Cam-Lok™ product selector guide

Selecting the correct Cam-Lok™ product series is easy

Just identify the cable size, voltage, amperage and approval requirements.

NEMA enclosure rating systems

NEMA Rating (National Electrical Manufacturers Association)

The NEMA rating indicates the level of protection the device has against water and dirt intrusion.

NEMA RATING CHART

Protection From	Device Locations		
	Indoors	Indoors or Outdoors	Outdoors with External Mechanisms
Limited amounts of falling dirt	NEMA Type 1		
Limited amounts of falling dirt and dripping water	NEMA Type 2		
Rain, sleet, falling dirt, windblown dust, damage from ice formation		NEMA Type 3	
Rain, sleet, falling dirt, damage from ice formation		NEMA Type 3R	
Rain, sleet, windblown dust, ice laden operation possible			NEMA Type 3S
Windblown dust and rain, splashing water, hose-directed water, damage from ice formation		NEMA Type 4	
Corrosion, windblown dust and rain, splashing water, hose-directed water, damage from ice formation		NEMA Type 4X	
Falling dirt and settling airborne dust, lint, fibers and dripping non-corrosive liquids	NEMA Type 5		
Hose-directed water, entry of water during occasional short-term limited depth submersion, damage from ice formation		NEMA Type 6	
Hose-directed water, entry of water during long-term limited depth submersion, damage from ice formation		NEMA Type 6P	
Class I, Division 1, groups A,B,C or D hazardous locations (as defined by NEC®, NFPA 70)	NEMA Type 7 (commonly referred to as explosion-proof)		
Class I, Division 1, groups A,B,C or D hazardous locations (as defined by NEC®, NFPA 70)	NEMA Type 8 (commonly referred to as oil-immersed)		
Class II, Division 1, groups E, F and G hazardous locations (as defined by NEC®, NFPA 70)	NEMA Type 9 (commonly referred to as dust-ignition-proof)		
Meets applicable requirements of the Mine Safety & Health Administration, 30 CFR, Part 18		NEMA Type 10	
Circulating dust, falling dirt, dripping non-corrosive liquids	NEMA Type 12 NEMA Type 12K		
Dust, spraying of water, oil and non-corrosive coolant	NEMA Type 13		

F-Series applications, features & benefits

Reduced downtime and higher efficiency

Cam-Lok™ F-Series connectors are specifically designed to meet the needs of harsh industrial welding applications. F-Series plugs and receptacles offer superior reliability and safety while reducing downtime.

Applications

F-Series plugs and receptacles are specifically designed for industrial applications where electrical equipment is exposed to harsh environments.

They are ideal for welding equipment, power distribution panels, patch panels and heat treating applications and are insulated for safety with reinforced thermoplastic or epoxy, or watertight elastomeric.

Specifications

Electrical Ratings

- 120 Volts AC
- Up to 315 Amps Continuous, 550 Amps Intermittent

Temperature Ratings

- Standard: Up to 105°C
- High Temperature: Up to 180°C (365°F)

Materials

- Accepts cable sizes: #8 AWG - 4/0
- Insulator material: Reinforced thermoplastic (E1010, E1012), reinforced epoxy (E1012 High-Temperature) or elastomeric (E1012 only)
- Contact material: Brass or silver-plated brass

Environmental

- NEMA 3

Certifications

- Meets OSHA requirements for welding connectors
- Meets NEC® Code Requirements for listed connectors that are of the locking type

Features

Single pole connectors

Cam-Lok™ F-Series E1010 plugs & receptacles

Cable Size #8 – #4 AWG, 120V/AC
Up to 150A Continuous, 200A Intermittent
NEMA 1

F-Series E1010, reinforced thermoplastic

Features

- Double cam principle provides a positive, vibration-proof connection.
- Self-compensating for wear.
- No moving contact surfaces, eliminating arcing or burning.
- Superior electromechanical connections.
- Locked contacts will withstand a pulling force of 1,000 lbs.
- 1/3 of a turn assures a high pressure contact approaching 600 lbs. per sq. in. providing minimum resistance.
- Contacts carefully machined from a high conductivity brass to a smooth sliding fit and easy locking action.
- Thermoplastic insulators molded from colorfast material, color-coded for easy identification.
- Panel receptacles are safety insulated for direct mounting to steel panels.
- Accepts a wide range of cable sizes.

Cam-Lok™ J-Series applications, features & benefits

Designed for reliable, portable, quick and safe single pole connections

Cam-Lok™ J-Series connectors are specifically designed to meet the needs of demanding portable applications. J-Series plugs and receptacles are the proven industry standard single pole connectors for reliability and service with added safety.

Applications

J-Series plugs and receptacles are specifically designed for industrial power distribution applications requiring quick, tool-free connections.

Ideal for portable power, power distribution, motors, generators and entertainment applications; J-Series replaces traditional hardwiring while cutting downtime and maintenance.

J-Series connectors are insulated, shatter/crack resistant and water tight plus heat, weather, ozone, oil and abrasion resistant.

Specifications

Cam-Lok™ J-Series applications, features & benefits

Discover how Cam-Lok™ J-Series connectivity outperforms hardwiring

Cam-Lok™ J-Series connectors quickly replace traditional hardwiring and offer more safety with integrated watertight insulators and a strain relief system. Plus, a wide range of sizes, colors and accessories are available for complete flexibility.

Features

Single pole connectors

Cam-Lok™ J-Series E1015 plugs

Cable Size #8 – #4 AWG
600V AC/DC, Up to 150A Continuous
NEMA 3R

J-Series E1015, elastomeric, non-vulcanized, single set screw connection

Features

- Double cam principle provides a positive, vibration-proof connection.
- Self-compensating for wear.
- No moving contact surfaces, eliminating arcing or burning.
- Superior electromechanical connections.
- Locked contacts will withstand a pulling force of 1,000 lbs.
- 1/3 of a turn assures a high pressure contact approaching 600 lbs. per sq. in. providing minimum resistance.
- Contacts carefully machined from a high conductivity brass to a smooth sliding fit and easy locking action.
- Watertight elastomeric insulators molded from colorfast material, color-coded for easy phase identification.
- Recessed contacts protected by insulating jacket that extends beyond contact ends for safety.
- Integrated strain relief system features a retaining wire that prevents cable jacket pull-away and bare conductor exposure.
- Accepts a wide range of cable sizes.

MATERIALS

- Insulator: TPE

TEMPERATURE RATING

- Operating ambient: -40° C to 105° C

Single pole connectors

Cam-Lok™ J-Series E1015 plugs

Cable Size #8 – #4 AWG
600V AC/DC, Up to 150A Continuous
NEMA 4

J-Series E1015, rubber, vulcanized, crimp connection

Features

- Vulcanizing permanently affixes plug insulator to cable for maximum protection against bare conductors, water, all kinds of weather, corrosion and other contaminants (requires vulcanizing kit/presses).
- Vulcanizing also reduces cable breakage by distributing flexing over a wide area for an effective strain relief system.
- Double cam principle provides a positive, vibration-proof connection.
- Self-compensating for wear.
- No moving contact surfaces, eliminating arcing or burning.
- Superior electromechanical connections.
- Locked contacts will withstand a pulling force of 1,000 lbs.
- 1/3 of a turn assures a high pressure contact approaching 600 lbs. per sq. in. providing minimum resistance.
- Contacts carefully machined from a high conductivity brass to a smooth sliding fit and easy locking action.
- Watertight neoprene insulators molded from colorfast material, color-coded for easy phase identification.
- Recessed contacts protected by insulating jacket that extends beyond contact ends for safety.

Single pole connectors

Cam-Lok™ J-Series E-Z1016 plugs

Cable Size 3/0 – 4/0
600V AC/DC, Up to 400A Continuous
NEMA 3R

J-Series E-Z1016, elastomeric, non-vulcanized, crimp connection

Features

- E-Z assembly and disassembly-no tools needed.
- Double cam principle provides a positive, vibration-proof connection.
- Self-compensating for wear.
- No moving contact surfaces, eliminating arcing or burning.
- Superior electromechanical connections.
- Locked contacts will withstand a pulling force of 1,000 lbs.
- 1/3 of a turn assures a high pressure contact approaching 600 lbs. per sq. in. providing minimum resistance.
- Contacts carefully machined from a high conductivity brass to a smooth sliding fit and easy locking action.
- Watertight elastomeric insulators molded from colorfast material, color-coded for easy phase identification.
- Recessed contacts protected by insulating jacket that extends beyond contact ends for safety.
- Integrated strain relief system features a retaining wire that prevents cable jacket pull-away and bare conductor exposure.
- Plugs feature a high-strength, molded-in-place locking ring to capture and secure the insulator to the contact.

Cable Size #2 – #1 AWG
600V AC/DC, Up to 190A Continuous
NEMA 4

J-Series E1016, rubber, vulcanized, crimp connection

Features

- Vulcanizing permanently affixes plug insulator to cable for maximum protection against water, all kinds of weather, corrosion and other contaminants (requires vulcanizing kit/presses).
- Vulcanizing also reduces cable breakage by distributing flexing over a wide area for an effective strain relief system.
- Double cam principle provides a positive, vibration-proof connection.
- Self-compensating for wear.
- No moving contact surfaces, eliminating arcing or burning.
- Superior electromechanical connections.
- Locked contacts will withstand a pulling force of 1,000 lbs.
- 1/3 of a turn assures a high pressure contact approaching 600 lbs. per sq. in. providing minimum resistance.
- Contacts carefully machined from a high conductivity brass to a smooth sliding fit and easy locking action.
- Watertight neoprene insulators molded from colorfast material, color-coded for easy phase identification.
- Recessed contacts protected by insulating jacket that extends beyond contact ends for safety.

Single pole connectors

Cam-Lok™ J-Series E1016 plugs

Cable Size 3/0 – 4/0
600V AC/DC, Up to 315A Continuous
NEMA 4

J-Series E1016, rubber, vulcanized, crimp connection

Features

- Vulcanizing permanently affixes plug insulator to cable for maximum protection against water, all kinds of weather, corrosion and other contaminants (requires vulcanizing kit/presses).
- Vulcanizing also reduces cable breakage by distributing flexing over a wide area for an effective strain relief system.
- Double cam principle provides a positive, vibration-proof connection.
- Self-compensating for wear.
- No moving contact surfaces, eliminating arcing or burning.
- Superior electromechanical connections.
- Locked contacts will withstand a pulling force of 1,000 lbs.
- 1/3 of a turn assures a high pressure contact approaching 600 lbs. per sq. in. providing minimum resistance.
- Contacts carefully machined from a high conductivity brass to a smooth sliding fit and easy locking action.
- Watertight neoprene insulators molded from colorfast material, color-coded for easy phase identification.
- Recessed contacts protected by insulating jacket that extends beyond contact ends for safety.

Three-fer Tapping Tee 45° M-F-F-F

Three-Way Lay-Down "T" Connectors

CERTIFICATIONS

- Listed to UL1691
- Listed to CSA C22.2 No.1691-12
- CSA certified to C22.2, No. 182.3 LR13963
- NEMA 3R

MATERIALS

- Body: TPE

TEMPERATURE RATING

- Operating ambient: -40° C to 105° C

Single pole connectors

Cam-Lok™ J-Series E1016 terminals

Cable Size #2 AWG – 4/0
600V AC/DC, Up to 400A Continuous
NEMA 3R

J-Series E1016, elastomeric or rubber

Features

- Double cam principle provides a positive, vibration-proof connection.
- Self-compensating for wear.
- No moving contact surfaces, eliminating arcing or burning.
- Superior electromechanical connections.
- Locked contacts will withstand a pulling force of 1,000 lbs.
- 1/3 of a turn assures a high pressure contact approaching 600 lbs. per sq. in. providing minimum resistance.
- Contacts carefully machined from a high conductivity brass to a smooth sliding fit and easy locking action.
- Product body molded from colorfast material, color-coded for easy phase identification; safety terminals are watertight elastomeric, terminal are rubber.

Cam-Lok™ J Series E1017 protective caps with lanyards

NEMA 3R

J-Series E1017 rubber

Features

- Resilient rubber body provides superior protection against elements.
- Molded from colorfast material color-coded for easy phase identification.
- Attaches directly to new or existing plugs and receptacles.
- Provides NEMA 3R protection.
- Complete color offering.
- Lanyard provided to prevent loss.

Cam-Lok™ Standard Series E-Z1018 plugs

Cable Size #2 AWG – 2/0
600V AC/DC, Up to 300A Continuous
NEMA 3R

Standard Series E-Z1018, elastomeric, non-vulcanized, double set screw connection

Features

- E-Z assembly and disassembly.
- Double cam principle provides a positive, vibration-proof connection.
- Self-compensating for wear.
- No moving contact surfaces, eliminating arcing or burning.
- Superior electromechanical connections.
- Locked contacts will withstand a pulling force of 1,000 lbs.
- 1/3 of a turn assures a high pressure contact approaching 600 lbs. per sq. in. providing minimum resistance.
- Contacts carefully machined from a high conductivity brass to a smooth sliding fit and easy locking action.
- Watertight elastomeric insulators molded from colorfast material, color-coded for easy phase identification.
- Accepts a wide range of cable sizes.

Posi-Lok™ applications, features & benefits

Quick and safe power distribution connection system

Designed to meet Article 520-53 Section K and Article 530-22 Section A (NEC) Standards, the built-in safety features require the user to connect or disconnect each plug in sequence. Protective receptacle covers cannot be raised until the preceding plug is locked into position.

Applications

Posi-Lok™ power distribution panels bring a new level of safety to electrical power applications.

Posi-Lok™ systems utilize single conductor cable that can be used to full amperage capability without the need to derate like multi-conductor solutions.

Posi-Lok™ products are ideal for disaster relief, temporary power, standby emergency power and power distribution applications.

Specifications

Electrical Ratings

- 600 Volts
- 200 Amps Continuous (E0200)
- 400 Amps Continuous (E0400)

Temperature Ratings

- -40° C to 105° C

Materials

- Cable Sizes: #2-4/0
- Insulator: Elastomeric
- Contact: Copper

Environmental

- NEMA 3

Certifications

- UL Listed: E67181
- CSA Certified: LR13963-48

Features

- 1 Safe, sequential interlock ensures ground mates first and breaks last
- 2 Limit switch capabilities

- 3 Reliable Posi-Lok, Cross-Phase Protection System ensures phase integrity
- 4 UL Listed and CSA Certified

- 6 Quick and easy installation - Panels can be mounted into a standard 19-inch rack

- 7 Shatter-resistant insulators and polarizing shells provide long-lasting, durable connectors

- 5 Lockout-Tagout compatible for safety and security

- 8 Double set screw termination for added strength and quick installation (crimp also available)

- 9 Plugs are uniquely keyed and color-coded to eliminate cross-phasing

Cut-away view of E0400 male plug

Quick and efficient standby and emergency power

Posi-Lok™ distribution panels use lightweight, single conductor cables to provide the means for hurried personnel to quickly and safely connect and disconnect power systems without having to use any tools.

Posi-Lok™ Connectors

Now there's no need to haul around huge, multi-conductor cables. Posi-Lok Power Distribution Systems let you use lighter, single conductor cables rated at higher amperages.

Posi-Lok™ plugs feature recessed electrical contacts that are protected by shatter-resistant insulators and impact-resistant molded sleeves.

More than 25 years of field testing has proven that the unique elastomeric tapered insulator allows maximum flexing with minimum breakage. There are no metal clamps or grommets to cause cable failure.

The same plugs that connect to panels also connect to each other so that you can use long runs of cable. Polarity is assured because each plug is uniquely keyed and color-coded for easy, positive connecting.

Single pole connectors

Posi-Lok™ plugs and panels E0200 Series

Cable Size #2 AWG-2/0
600V AC/DC, Up to 200A Continuous

Posi-Lok™ E0200 Series female panels and male plugs

Features

- Designed to meet Article 520-53 Section K and Article 530-22 Section A (NEC) standards.
- Sequential interlock system requires the user to connect and disconnect each plug in sequence.
- Polarized plugs and panels eliminate the possibility of cross-phasing.
- Built-in strain relief reduces cable strain.
- Proven Cam-lok double cam principle provides a positive, vibration-proof connection.
- No moving contact surfaces, eliminating arching or burning of contacts.
- Recessed contacts protected by insulating jacket that extends beyond contact ends for safety.

Male Plug Assembled length is 8 3/4"

Assembled length is 7 1/4"

CERTIFICATIONS

- Listed to UL498, File No. E67181
- CSA certified to C22.2 No. 182.3-M1987, File No. LR13963

MATERIALS

- Insulator: TPE
- Polarizing shell: Thermoplastic

TEMPERATURE RATING

- Operating ambient: -40° C to 105° C

Panel without limit switch mounting dimensions

PROTECTIVE PLUG CAPS

PART NO.	DESCRIPTION
A100601-17	Cap for male E0400
A100602-17	Cap for female E0400
A201319-1	Cap for male E0200
A201319-1	Cap for female E0200

Single pole connectors

Posi-Lok™ tools and accessories

Replacement parts, crimping nest and presses

PART NUMBER	DESCRIPTION
A400001	Assembly Tool.
A100632	Tool for removing contacts from insulators.
A100072	Cable Cutter - #2 - 4/0 Cable.
201310	Insulator holding bracket.
A201303	Assembly tool for 200A plugs.
A200020-3	COM-A-LONG for pulling male contact.
A200020-4	COM-A-LONG for pulling female contact.
A101208	2 oz. tube silicon grease for lubricating mating end of synthetic rubber insulators.

CRIMPING NEST AND PRESSES
