LOCTITE® 3090™ is a two component, fast curing, gap filling adhesive with excellent bonding characteristics to a variety of substrates including plastics, rubbers and metals. LOCTITE® 3090™ is designed for the assembly of parts with varying or undefined bond gaps up to 5 mm (0.2 in), or for applications where complete cure of excess adhesive is a requirement. The gel consistency prevents adhesive flow even on vertical surfaces. LOCTITE® 3090™ is also suited for bonding porous materials such as wood, paper, leather and fabric.

**TYPICAL PROPERTIES OF UNCURED MATERIAL**

**Part A:**
- Specific Gravity @ 25 °C: 1.1
- Flash Point - See SDS
- Casson Viscosity, 25 °C, mPa·s (cP): Cone and Plate Rheometer: 150 to 450

**Part B:**
- Casson Viscosity, 25 °C, mPa·s (cP): Cone and Plate Rheometer: 10 to 30
- Flash Point - See SDS

**Mixed:**
- Open Time @ 25 °C, seconds: 90 to 180

**TYPICAL CURING PERFORMANCE**

Curing is initiated on mixing the Part A and Part B components. Handling strength is achieved rapidly; full strength is achieved over 24 hours.

**Cure Speed vs. Substrate**

The rate of cure will depend on the substrate used. The graph below shows the shear strength developed with time on steel lap shears compared to different materials and tested according to ISO 4587.

**Cure Speed vs. Bond Gap**

The rate of cure will depend on the bondline gap. The following graph shows the shear strength developed with time on Polycarbonate lap shears at different controlled gaps and tested according to ISO 4587.

**Cure Speed vs. Temperature**

The rate of cure will depend on the ambient temperature. The graph below shows the shear strength developed with time at different temperatures on Polycarbonate lap shears and tested according to ISO 4587.
TYPICAL PROPERTIES OF CURED MATERIAL
Cured for 1 week @ 22 °C
Physical Properties:
Glass Transition Temperature ISO 11359-2, °C 116
Shore Hardness, ISO 868, Durometer D 79
Tensile Strength, at break, ISO 527-3 N/mm² 28
  (psi) 4,060
Tensile Strength, at yield, ISO 527-3 N/mm² 28
  (psi) 4,060
Tensile Modulus, ISO 527-3 N/mm² 1,870
  (psi) 271,150
Elongation, at break, ISO 527-3, % 2.5
Elongation, at yield, ISO 527-3, % 2.5
Coefficient of Thermal Expansion, ISO 11359-2, K⁻¹ 110×10⁻⁶
Coefficient of Thermal Conductivity, ISO 8302, W/(m·K) 0.35

Electrical Properties:
Volume Resistivity, IEC 60093, Ω·cm 250×10¹⁵
Surface Resistivity, IEC 60093, Ω 400×10¹⁵

TYPICAL PERFORMANCE OF CURED MATERIAL
Adhesive Properties:
Cured for 30 seconds @ 22 °C
Tensile Strength, ISO 6922:
  Buna-N (Part A only) N/mm² ≥6 (psi) ≥870

Cured for 24 hours @ 22 °C
Lap Shear Strength, ISO 4587:
  Steel (grit blasted) N/mm² 21
    (psi) 3,045
  Aluminum (etched) N/mm² 9
    (psi) 1,300
  Zinc dichromate N/mm² 9
    (psi) 1,300
  ABS * N/mm² 8
    (psi) 1,200
  PVC N/mm² 8
    (psi) 1,200
  Phenolic N/mm² 2
    (psi) 290
  Polycarbonate * N/mm² 12
    (psi) 1,740
  GRP N/mm² 4
    (psi) 580
  Neoprene N/mm² 1
    (psi) 145
  Wood (Oak) N/mm² 11
    (psi) 1,600
  Wood (Pine) N/mm² 11
    (psi) 1,600
  Wood (Chipboard) N/mm² 1.5
    (psi) 220
  Leather N/mm² 2
    (psi) 290

* substrate failure

TYPICAL ENVIRONMENTAL RESISTANCE
Cured for 1 week @ 22 °C
Lap Shear Strength, ISO 4587:
  Steel (grit blasted)

Hot Strength
Tested at temperature

Directions for use:
1. Bond areas should be clean and free from grease. Clean all surfaces with a Loctite® cleaning solvent and allow to dry.
2. To use, Part A and Part B must be blended. Product can be applied directly from dual cartridge by dispensing through the mixer head supplied. Discard the first 1 to 2 cm of bead dispensed.
3. Apply mixed adhesive to one of the bond surfaces. Do not use items like tissue or a brush to spread the adhesive. Assemble the parts within a few seconds. The parts should be accurately located, as the short fixture time leaves little opportunity for adjustment.
4. Bonds should be held fixed or clamped until adhesive has fixtured.
5. Product should be allowed to develop full strength before subjecting to any service loads (typically 24 hours after assembly).

Loctite Material Specification
LMS dated February 12, 2010. Test reports for each batch are available for the indicated properties. LMS test reports include selected QC test parameters considered appropriate to specifications for customer use. Additionally, comprehensive controls are in place to assure product quality and consistency. Special customer specification requirements may be coordinated through Henkel Quality.

Storage
Store product in the unopened container in a dry location. Storage information may be indicated on the product container labeling.

Optimal Storage: 2 °C to 8 °C. Storage below 2 °C or greater than 8 °C can adversely affect product properties. Material removed from containers may be contaminated during use. Do not return product to the original container. Henkel Corporation cannot assume responsibility for product which has been contaminated or stored under conditions other than those previously indicated. If additional information is required, please contact your local Technical Service Center or Customer Service Representative.

Conversions
\[(^\circ C \times 1.8) + 32 = ^\circ F\]
\[kV/mm \times 25.4 = V/mil\]
\[mm / 25.4 = inches\]
\[\mu m / 25.4 = mil\]
\[N \times 0.225 = lb\]
\[N/mm \times 5.71 = lb/in\]
\[N/mm^2 \times 145 = psi\]
\[MPa \times 145 = psi\]
\[N \times 8.851 = lb/in\]
\[N \times 0.738 = lb/ft\]
\[N\cdot mm \times 0.142 = oz/in\]
\[mPa\cdot s = cP\]

Note:
The information provided in this Technical Data Sheet (TDS) including the recommendations for use and application of the product are based on our knowledge and experience of the product as at the date of this TDS. The product can have a variety of different applications as well as differing application and working conditions in your environment that are beyond our control. Henkel is, therefore, not liable for the suitability of our product for the production processes and conditions in respect of which you use them, as well as the intended applications and results. We strongly recommend that you carry out your own prior trials to confirm such suitability of our product.

For safe handling information on this product, consult the Safety Data Sheet (SDS).

GENERAL INFORMATION
This product is not recommended for use in pure oxygen and/or oxygen rich systems and should not be selected as a sealant for chlorine or other strong oxidizing materials.

Injury caused by our negligence and any liability under any applicable mandatory product liability law.

In case products are delivered by Henkel Belgium NV, Henkel Electronic Materials NV, Henkel Nederland BV, Henkel Technologies France SAS and Henkel France SA please additionally note the following:

In case Henkel would be nevertheless held liable, on whatever legal ground, Henkel’s liability will in no event exceed the amount of the concerned delivery.

In case products are delivered by Henkel Colombiana, S.A.S. the following disclaimer is applicable:

The information provided in this Technical Data Sheet (TDS) including the recommendations for use and application of the product are based on our knowledge and experience of the product as at the date of this TDS. Henkel is, therefore, not liable for the suitability of our product for the production processes and conditions in respect of which you use them, as well as the intended applications and results. We strongly recommend that you carry out your own prior trials to confirm such suitability of our product.

Any liability in respect of the information in the Technical Data Sheet or any other written or oral recommendation(s) regarding the concerned product is excluded, except if otherwise explicitly agreed and except in relation to death or personal injury caused by our negligence and any liability under any applicable mandatory product liability law.

In case products are delivered by Henkel Corporation, Resin Technology Group, Inc., or Henkel Canada Corporation, the following disclaimer is applicable:

The data contained herein are furnished for information only and are believed to be reliable. We cannot assume responsibility for the results obtained by others over whose methods we have no control. It is the user’s responsibility to determine suitability for the user’s purpose of any production methods mentioned herein and to adopt such precautions as may be advisable for the protection of property and of persons against any hazards that may be involved in the handling and use thereof. In light of the foregoing, Henkel Corporation specifically disclaims all warranties expressed or implied, including warranties of merchantability or fitness for a particular purpose, arising from sale or use of Henkel Corporation’s products. Henkel Corporation specifically disclaims any liability for consequential or incidental damages of any kind, including lost profits. The discussion herein of various processes or compositions is not to be interpreted as representation that they are free from domination of patents owned by others or as a license under any Henkel Corporation patents that may cover such processes or compositions. We recommend that each prospective user test his proposed application before repetitive use, using this data as a guide. This product may be covered by one or more United States or foreign patents or patent applications.
