LOCTITE® 641 is designed for the bonding of cylindrical fitting parts, particularly where disassembly is required for service operations. The product cures when confined in the absence of air between close fitting metal surfaces and prevents loosening and leakage from shock and vibration. Typical applications include retention of bearings onto shafts and into housings.

**TYPICAL PROPERTIES OF UNCURED MATERIAL**

Specific Gravity @ 25 °C | 1.07
Flash Point - See SDS
Viscosity, Brookfield - RVT, 25 °C, mPa·s (cP):
  - Spindle 2, speed 2.5 rpm, 1,215 to 2,750 LMS
  - Spindle 2, speed 20 rpm, 400 to 800 LMS
Viscosity, EN 12092 - MV, 25 °C, after 180 s, mPa·s (cP):
  - Shear rate 277 s⁻¹, 90 to 180

**TYPICAL CURING PERFORMANCE**

**Cure Speed vs. Substrate**

The rate of cure will depend on the substrate used. The graph below shows the shear strength developed with time on steel pins and collars compared to different materials and tested according to ISO 10123.

**Cure Speed vs. Bond Gap**

The rate of cure will depend on the bondline gap. The following graph shows shear strength developed with time on steel pins and collars at different controlled gaps and tested according to ISO 10123.

**Cure Speed vs. Temperature**

The rate of cure will depend on the temperature. The graph below shows the shear strength developed with time at different temperatures on steel pins and collars and tested according to ISO 10123.

**Cure Speed vs. Activator**

Where cure speed is unacceptably long, or large gaps are present, applying activator to the surface will improve cure speed. The graph below shows the shear strength developed with time on zinc dichromate steel pins and collars using Activator 7471™ and 7649™ and tested according to ISO 10123.
TYPICAL PROPERTIES OF CURED MATERIAL

Physical Properties:
- Coefficient of Thermal Expansion, \(8\times10^{-6}\) (ISO 11359-2, K\(^{-1}\))
- Coefficient of Thermal Conductivity, ISO 8302, 0.1 (W/(m·K))
- Specific Heat, kJ/(kg·K) 0.3

TYPICAL PERFORMANCE OF CURED MATERIAL

Adhesive Properties
After 24 hours @ 22 °C
Compressive Shear Strength, ISO 10123:
Steel pins and collars \(\geq 6.5 \text{ MS} (940)\) N/mm\(^2\) (psi)

TYPICAL ENVIRONMENTAL RESISTANCE
Cured for 1 week @ 22 °C
Compressive Shear Strength, ISO 10123:
Steel pins and collars

Heat Aging
Aged at temperature indicated and tested @ 22 °C

GENERAL INFORMATION
This product is not recommended for use in pure oxygen and/or oxygen rich systems and should not be selected as a sealant for chlorine or other strong oxidizing materials.

For safe handling information on this product, consult the Safety Data Sheet (SDS).

Where aqueous washing systems are used to clean the surfaces before bonding, it is important to check for compatibility of the washing solution with the adhesive. In some cases these aqueous washes can affect the cure and performance of the adhesive.

This product is not normally recommended for use on plastics (particularly thermoplastic materials where stress cracking of the plastic could result). Users are recommended to confirm compatibility of the product with such substrates.

Directions for use:
For Assembly
1. For best results, clean all surfaces (external and internal) with a LOCTITE® cleaning solvent and allow to dry.
2. If the material is an inactive metal or the cure speed is too slow, spray with Activator 7471™ or 7649™ and allow to dry.
3. For Slip Fitted Assemblies, apply adhesive around the leading edge of the pin and the inside of the collar and use a rotating motion during assembly to ensure good coverage.
4. For Press Fitted Assemblies, apply adhesive thoroughly to both bond surfaces and assemble at high press rates.

For the most direct access to local sales and technical support visit: www.henkel.com/industrial
5. **For Shrink Fitted Assemblies** the adhesive should be coated onto the pin, the collar should then be heated to create sufficient clearance for free assembly.

6. Parts should not be disturbed until sufficient handling strength is achieved.

**For Disassembly**

1. Apply localized heat to the assembly to approximately 250 °C. Disassemble while hot.

**For Cleanup**

1. Cured product can be removed with a combination of soaking in a Loctite solvent and mechanical abrasion such as a wire brush.

**Loctite Material Specification**

LMS dated September 1, 1995. Test reports for each batch are available for the indicated properties. LMS test reports include selected QC test parameters considered appropriate to specifications for customer use. Additionally, comprehensive controls are in place to assure product quality and consistency. Special customer specification requirements may be coordinated through Henkel Quality.

**Storage**

Store product in the unopened container in a dry location. Storage information may be indicated on the product container labeling.

**Optimal Storage**: 8 °C to 21 °C. Storage below 8 °C or greater than 28 °C can adversely affect product properties.

Material removed from containers may be contaminated during use. Do not return product to the original container. Henkel Corporation cannot assume responsibility for product which has been contaminated or stored under conditions other than those previously indicated. If additional information is required, please contact your local Technical Service Center or Customer Service Representative.

**Conversions**

(°C x 1.8) + 32 = °F
\[\text{kV/mm} \times 25.4 = \text{V/mil}\]
\[\text{mm} / 25.4 = \text{inches}\]
\[\text{µm} / 25.4 = \text{mil}\]
\[\text{N} \times 0.225 = \text{lb}\]
\[\text{N/mm} \times 5.71 = \text{lb/in}\]
\[\text{N/mm}^2 \times 145 = \text{psi}\]
\[\text{MPa} \times 145 = \text{psi}\]
\[\text{N-m} \times 8.851 = \text{lb-ft}\]
\[\text{N-m} \times 0.738 = \text{lb/in}\]
\[\text{N/mm} \times 0.142 = \text{oz-in}\]
\[\text{MPa s} = \text{cP}\]

**Note:**

The information provided in this Technical Data Sheet (TDS) including the recommendations for use and application of the product are based on our knowledge and experience of the product as at the date of this TDS. The product can have a variety of different applications as well as differing application and working conditions in your environment that are beyond our control. Henkel is, therefore, not liable for the suitability of our product for the production processes and conditions in respect of which you use them, as well as the intended applications and results. We strongly recommend that you carry out your own prior trials to confirm such suitability of our product.

Any liability in respect of the information in the Technical Data Sheet or any other written or oral recommendation(s) regarding the concerned product is excluded, except if otherwise explicitly agreed and except in relation to death or personal injury caused by our negligence and any liability under any applicable mandatory product liability law.

In case products are delivered by Henkel Colombia, S.A.S. the following disclaimer is applicable:
